

## HISTORY OF WORLD ARCHITECTURE

This series is edited by Pier Luigi Nervi and contains fourteen volumes, each detailing a particular period or style. All are well illustrated with photographs, plans, and sections. At the end of every volume is a chronological table, a selected bibliography, and a detailed index. The publisher of this 1970's hardback series is Abrams. At least one copy of each of these titles is on reference in the Architecture Library. There is a paperback series which was published in the 1980's by Rizzoli. The Architecture Library has most of these titles and they circulate. The call numbers given below are for the original hardback series.
