VETERINARY MEDICINE LIBRARY

Database Review: CAB Direct

CAB Abstracts is a comprehensive agricultural and applied life sciences database, providing citations and abstracts to international literature in the fields of agriculture, forestry, human nutrition, veterinary medicine, and the environment. Updated weekly, the database indexes journal articles, conference proceedings, books, book chapters, theses, and dissertations, in addition to annual reports, patents, and standards from 1910 to present. As the online equivalent of *Index Veterinarius* and *Veterinary Bulletin*, more veterinary literature is indexed in this database than in any other source. Complementary subject coverage includes animal breeding and genetics, animal nutrition, and aquaculture.

ADVANCED SEARCH

- Enter a term or multiple terms, using the search connectors *and*, *or*, *not*, *adj*, *with* or *near*. For example, enter: ((swine or pig*) not guinea). If you don't use connectors, *and* is implied.
- Use a truncation symbol (*) to search for plurals (not recommended for cats).
- Use a wildcard symbol (?) to substitute for one or more characters within a word. This is important when searching for terms with American and British spelling variants. For example, enter: feline and leuk?emia. Results include citations with the spelling variants for leukemia and leukaemia.
- Search All Fields or use the All Fields pull-down menus to limit your search to a specific field (including Article Title, Author Name, Geographical Location, and Subject Term).
- Search for your terms in the CAB Thesaurus by clicking the Thesaurus tab at the top of the page. Use this feature to identify broader and narrower subject terms to refine your search. The CAB Thesaurus will help you to identify British and American Spelling Variants.
- Limit your search to a specific publication year, document type or language.
- Click on the Help tab at the top of the page for quick pointers to help improve your search.

RESULTS

- To view a complete article abstract, click on the article title or click "View Abstract".
- To select article abstracts to email to yourself, or export to reference management software, place a in the box.
- To export citations to **RefWorks**, a software utility that allows you to format bibliographies and manuscripts in seconds, click "Download Selected Citations". Save the file to your desktop, and then import from RefWorks. For more information on RefWorks and to sign up for a RefWorks account, go to <http://library.osu.edu/help/RefWorks/>. For detailed instructions on how to export records to *Endnote*, *ProCite*, or *Reference Manager* software, see <http://library.osu.edu/help/faq.php>.
- You can refine your search results by topic, author, journal name, publication year, geographic location, and more.

ACCESSING ARTICLES

- To locate the full text of an article, click the **View Full Text** icon when it's available. This will take you directly to a PDF of any content that CAB makes available.

- To obtain the full text of documents when a direct link is not available, click the **Find It!** icon. This will open up a new tab or window with a link to the full text if the OSU Libraries have a subscription, and will provide information about the Libraries' print holdings. If the OSU Libraries do not have electronic access to the document, you will see a link to request a copy via interlibrary loan.
