## Ohio Flood News

Governor DiSalle appeared before the Ohio Legislature Monday and asked for 14 million dollars in relief funds. Three millions of the total would be used for flood relief. The remainder of the money would go to cover the state's share of relief spending for the rest of the fiscal year, ending next June 30.

DiSalle said about \$300,000 is needed to cover Ohio National Guard expenses during the flood. Another \$100,000 would be earmarked for a survey to determine the cause of the floods and prevention of future ones.

There was every indication the General Assembly intends to grant the request and make the money available immediately. Four bills to accomplish the Governor's program were introduced in the House last night.

The flood-swollen Ohio River, meanwhile, is still posing a threat to Cincinnati and southwestern Ohio. Although the river crested in the Queen City at 55½ feet yesterday, the Weather Bureau says heavy rainfalls in the next few days could cause more trouble.

The last of the serious trouble spots in Ohio is Fremont, where hundreds of residents remain homeless. Damages to the city have been estimated at 10 million dollars. An effort will be made to reopen Fremont schools today.

Last week's floods may cause the restoration of the Scioto-Sandusky Conservancy District. Judge Myron Gessaman of Franklin County says he has sent letters to the other 16 members asking for their feeling toward re-organizing. The members less than two weeks ago decided to disband.

### Clothing Wanted

A clothing drive for evacuated families is being sponsored by the Council of Dormitory Presidents today.

Dormitory students are asked to donate any type of clothing. Any other students wishing to donate may bring the articles to any of the dormitories.

Bill Bitticker, of the Scioto Club, chairman of the drive, said the clothing will be picked up Wednesday by the Salvation Army for distribution.

Dr. John Holzaepfel

### Holzaepfel to Give Marriage Series Lecture on Sex

Dr. John Holzaepfel, assistant professor of obstetrics and gynecology, will discuss sex in marriage at 4 p.m. Thursday in Hagerty Hall Auditorium. He will speak on "From Here To Maternity" in the marriage series lecture.

Dr. Holzaepfel, member of the University faculty since 1948, received his bachelor of arts and doctor of medicine degrees from the University of Michigan. He also received a master of medical science degree from Ohio State.

In 1955-1956 Dr. Holzaepfel was president of the Columbus Obstetric-Gynecologic Society and is a member of other professional organizations. He has written a number of articles for medical publications.

The next lecturer in the marriage series will be the Rev. Charles Harrison, chaplain of the Boys' Industrial School in Lancaster, Ohio.

## Rubber Checks Creating Problems; University Considers Charging Fee

By Carole Greenbaum

Some have it and some don't. If you don't have it, don't write a check for it!

Ernest W. Leggett, assistant comptroller, said the University is considering charging a fee for bad checks. He said students wrote 164 bad checks for \$15,000 Autumn Quarter and that the same number is expected this quarter.

LEGGETT SAID the University has no monetary losses, but spends much time tracing checks. He said this is because all checks must go through the State Treasurer's office before they can be sent to their respective banks.

"Different banking systems and the distances to which some checks must be sent present problems."

According to Leggett, the most trouble occurs at the beginning and end of the quarter. "Students are either paying fees or trying to take care of other obligations," he said.

IN SOME CASES it is difficult to locate a student because he has given a false address, Leggett said. "Our last resort is to have a campus policeman pull him out of class."

Leggett said that a student's registration is cancelled if he does not take care of a bad check after notification.

Some students write checks knowing they don't have funds to cover them. "A male student did this in the student loan office last quarter in order to get his grades," Leggett observed.

LEGGETT SAID the University has more bad checks from men than women. "The women seem to pay more attention to their bank accounts."

A checking account is a valuable medium of exchange for a student but he must use it correctly, Leggett said.

Ernie Park, business manager of the Ohio Union, said that if a student does not act after being notified about a bad check, a note is put at the check-cashing desk instructing that no more checks be cashed for that student until he takes care of the bad one.

PARK SAID that after two com-

plaints, check-cashing privileges are taken away permanently.

Mrs. K. C. Palmer, head cashier at Long's Book Store, said the store doesn't have too much trouble considering the number of checks it handles.

"Contacting the students is not hard and we seldom have to call the University for assistance," she said.

A SPOKESMAN for Marvin's, a men's clothing store on High St., said the store insists that identification be signed when checks are cashed.

He also said he recently put up a sign, "There will be a 75-cent charge for a check returned for any reason." This has discouraged students who know they don't have funds to cover a check.

Wilbur Lendon, an employee at Freddie's at Neil and 11th Ave., said they rarely get stuck with bad checks. "We have to wait until fall to collect for those received Spring Quarter, but there is no real problem."

Robert Crawford of Campus Neil Drug Store said the end of the month is the worst time for bad checks. "We always obtain the address and phone number of the check casher so it is fairly easy to get in touch with him."

### 4th Shot Advised

A booster or fourth injection of poliomyelitis vaccine is recommended this year. The interval between this injection and completion of the basic series should be not less than six months. The vaccine is available at the University Health Service and is given free to those with student insurance, while to others the charge is one dollar.

### Five Students Held In Probe Of 60 Thefts

Five Ohio State freshmen were among ten North Side teenagers being held in City Prison last night for investigation of some 60 burglaries committed during the past several months.

"Charges will probably be made some time Tuesday," Sgt. Reeder of the Columbus detective bureau said. Due to the different degrees of participation, Reeder felt that charges would range from petty larceny to burglary.

The youths were apprehended over the weekend when a cruiser officer identified the odd-colored car that police had heard of in connection with the burglaries. Police found four stolen tires on the wheels of the car the teenagers drove and five other stolen tires inside the car.

"About \$600 in stolen goods were found in one of the youth's home," Lt. Robert Baus, head of the burglary squad reported. "Most of the stuff we'll never find, however," he said.

### Library Hosts Tenor Today

Richard Dyer-Bennet will be the special guest today for a coffee hour in the Browsing Room, Main Library at 3:30 p.m.

Dyer-Bennet who has been called "a minstrel without a court to sing to" will give a concert tomorrow night in Mereson Auditorium at 8 p.m.

His melodies rang from the song of victory sung by the conquering English soldiers after the battle of Agincourt, to the "Waltzing Matilda" sung by the Australian troops in World War II.

## Religion In Life : Trials of Communal, Interracial Farm Related

By Sonja Judy

"From each according to his ability, to each according to his need."

This idea, originally expressed by Karl Marx, is the governing rule of 43 people now living at Koinonia, a farm of communal living, according to Clarence Jordan. He spoke Monday at a RIL seminar.

Koinonia, a 1083-acre farm in Americus, Georgia, is open to all men, regardless of race or color. Here the people live in individual homes or apartments, but eat in a common kitchen and pool their abilities and labor for the good of the group, Jordan said.

He outlined its history this way: THE FARM was established in 1942 on a foundation of brother-

hood for all men, regardless of race. With such a system, it was soon found that approval or opposition to the farm closely followed on the heels of national opinion. At its founding, the nation was at war. There was no opposition to it as a societal group. But it was harassed by local townsmen for its pacifistic doctrine.

When "McCarthyism" hit the American scene, Jordan said, the group was accused of being Communistic because of its communal type of living which resembles the system advocated by Marx.

Continuing his recital, Jordan said:

THE SUPREME COURT decision on integration in 1954

brought new problems to the farm which still remain. Jordan, a native Georgian, explained that small groups of segregationists launched a four-pronged attack on the people of Koinonia.

This included various legal actions, economic boycotts of farm purchases and sales, psychological warfare with burning crosses by the Klu Klux Klan and physical violence to the residents and their property. All this was aimed at routing the people from the area.

Citizens of the nearby town, Jordan said, appeared to take a middle-of-the-road attitude toward both sides. This, he added, served only to create a volatile atmosphere for segregationist-provoked activ-

Clarence Jordan

ity against the farm. As a result, the chief support of the farm is selling pecans (to northern cities) which are now grown after local boycotts on other agricultural goods.

WITH THE PRESENT anti-integration movement, the population of Koinonia dropped to 43 from 65 as all the Negro residents moved further north where they felt there would be less controversy.

The people of Koinonia have had no difficulty with the Federal government, but locally they have lost all legal battles.

In his talk, "Witness By Persecution — The Story of Koinonia

## Draft

A recent article in the "Nation" magazine by John C. Esty, Jr. and entitled "Draft Dodger or Patriot," describes the plight of the male college student faced with the prospect of entering the armed services via the Universal Service draft law.

The article gives this advice to the collegian: "Don't plan—wait; become a father sooner than you had planned; go to graduate school even though you're not ready; and pick your college major after consulting the draft exempt list." This seems to be the only way out for the ambitious college man who doesn't want future plans to be interrupted by a tour of duty as clerk-typist in company headquarters; regardless of his sense of patriotism.

Esty states the fallacy of the Universal Service law, which in fact is not universal, and, he says, places intelligent men on marching maneuvers in isolated areas where their talent is wasted. Those who stay out are these: 1—the father, 2—the senior who goes to graduate school, 3—the 40 per cent who do not pass the physical requirements, 4—a person with dependents, 5—ministerial or medical candidates.

In the final analysis, only about one in four young men actually enter the service through the draft. Who can blame the college student for trying to be the one not to go when so many are getting out of it.

Many are volunteering for six-months programs, the most popular alternate to complete escape. Others go to officers' candidate schools or ROTC as a better way to take the medicine.

Currently, students are rarely drafted below the age of 23, and, by executive order, the local boards are required to exhaust all the men in the following categories: 1—Delinquents ("legal" draft dodgers. 2—Volunteers in the order in which they volunteered). 3—Non-volunteers, non-fathers between 18½ and 26 (oldest first). 4—Non-volunteer fathers between 18½ and 26 (oldest first). 5—Men over 26. Most are taken from categories two and three. With draft quotas dwindling, more and more eligible men are escaping the conscription, thus providing the fallacy of the "Universal Service."

The "Nation" states, "Every executive action in the past four years has been directed at relieving the pressure of the manpower pool on the draft apparatus by creating more attractive alternatives... Yet the monster grows each day. With the failure of these relief valves, the drafting age within category three will probably continue to rise until perhaps no one will be drafted except those who volunteer for service to avoid being drafted... the corruption of "universal" service is corrupting the college student's sense of duty, uncertainty is making cynics of them, and their talents and training are deliberately turned from the service of their country."

It is evident the student's sense of duty and patriotism to his country is suffering somewhat of a let-down due to our present draft laws. When the current law expires in June, 1959, Congress will have a chance to act on new legislation to remedy this undesirable situation.

## Editor's Mail Bag

### C Rations . . .

To the Editor:

It is with considerable amusement that I have been reading the editorial, letters and news articles concerning the food in the dormitories. I've eaten in dorm cafeterias a few times, and the food was, at that time, at least edible.

But for the benefit of those who feel the quality of the food is poor, I suggest the following remedy, to be applied during the vacation between quarters.

All students who are not satisfied with the dorm food will be given a week's supply of army C rations and a bayonet for their sole utensil. They will then sit on the windward side of any large rocky hill and eat these C rations cold out of the can, off the bayonet blade.

Complaints concerning dorm food should cease at once.

(Name Withheld on Request).

### Poem . . .

To the Editor:

Here is a poem appropriate for the season:  
Breathes there a man  
With soul so dead,  
Who never to himself hath said:  
"To heck with school; I'll stay in bed."

—George H. Brown Jr., Engr-3.

### BUDGET-MINDED

RANDOLPH, N. Y.—(UPI)—Randolph village trustees agreed—but only after considerable debate—to buy a brick schoolhouse with 11 classrooms, and auditorium, cafeteria and playroom. The total cost was \$1.

## Librarian Reviews Book on Mysticism

Editor's Note: This book review, written by Donald J. Pearce, assistant acquisition librarian, is the second of series of reviews written in connection with the Religion-in-Life program.

### MYSTICISM: CHRISTIAN AND BUDDHIST by Daisetz Teitaro Suzuki.

This is another volume in the "World Perspectives" Series being published by Harper under the editorship of such well-known names as Niels Bohr, Jacques Maritain, J. Robert Oppenheimer and Sarvepalli Radhakrishnan—a series "dedicated to the concept of man born out of a universe perceived through a fresh vision of reality" and in which "each author treats his subject from the broad perspective of the world community, not from the Judeo-Christian, Western or Eastern viewpoint alone."

ONE MIGHT suspect, from the name of the author of this particular volume, that it is concerned with a rather narrow view of Buddhism, since Dr. Suzuki is the world's foremost exponent of that sect of Buddhism known as Zen, and this suspicion is partly justified.

One is not prepared, however, to find that the Christian mysticism referred to in the title is solely that of Meister Eckhart.

The book is, in fact, chiefly concerned with showing the similarity between the mystic viewpoint of Eckhart and the monism of Buddhism; Eckhart's "little point" at which the soul becomes lost in God and Buddhism's "satori." Such a likeness is, of course, not hard to find when the question is "viewed from the Zen stand of enlightenment only by intuitive experience."

ROBERT LINSEN in his "Living Zen" maintains that all mystics have the same initial experience, but afterwards their sub-conscious supplies the visions and symbolism appropriate to their own particular sectarian dogma. Thus it is but a short step from Eckhart's "God head" to the Buddhist "Void."

The first part of the book is concerned with a description of

the beliefs of Eckhart and those basic to Buddhism, but the emphasis tends to be on Zen and its non-rational approach to enlightenment. Two appendices give the Buddhist viewpoint on transmigration and the views of Dr. Suzuki on the Crucifixion as a symbol of the difference between Eastern and Western modes of thought.

This portion also contains an interesting digression of the "verticality" of Christianity as opposed to the "horizontal" of Buddhism.

THE SECOND part consists of a very short chapter on the monistic theme of "I am that I am" or "is-ness," expressed by Eckhart in the phrase, "A flea to the extent that it is in God, ranks above the highest angel in his own right."

Explanations of the Shin and Zen expressions of this idea are given, followed by extensive appendix giving quotations from the letters of Rennyō and the poems of Saichi.

Unfortunately we are told little about Rennyō and nothing about Saichi. The book would be greatly helped by the addition of a glossary, index and bibliography.

DR. SUZUKI writes well, although the English language occasionally provides a pitfall for him. (He writes in one instance that Christianity is laden with mythology, and that there is some movement "to denude the religion of this unnecessary historical appendix.")

But this is an interesting work when read with the consideration in mind that the gap between Eastern and Western thought does seem to be closing and that interest in Zen is increasing, albeit as a fad and in connection with the "dharma bums" among the West Coast "beatniks."

For those interested in pursuing these ideas further, William James' "The varieties of religious experience" is a long standing classic and more specifically in Zen there are the many works of Daisetz Suzuki, Allan Watts' "The Way of Zen" and Kazuko Okakura's "The Book of Tea."

## LITTLE MAN ON CAMPUS by BIBLER

# Bucks Conquer Hawks, 86-72; Roberts Stars in 'Homecoming'

It was home sweet home for the Ohio State Buckeyes last night as they got back in the win column with an 86-72 win over the Iowa Hawkeyes.

Joe Roberts again held a big portion of the spotlight for the Bucks, dropping in 21 points and snaring rebounds by the buckets.

Iowa appeared ready to run the Bucks out of the Arena at the outset of the game, working a polished fast break to grab a quick lead.

The Bucks fought back quickly and Larry Siegfried, who bagged 22 points for the evening, put the Bucks ahead to stay with a long one-hander.

Iowa's league-leading scorer, Clarence Wordlaw, found the going rough against Ohio State. The Hawkeye managed only 11 points, well below his 22.8 average.

Sloppy court play brought Iowa the defeat. In beating the Hawk-

eyes, the Buckeyes notched a win against the only Big Ten club able to knock off top runner Michigan State.

A crowd of 8,395 watched the game in which tempers were as hot as play at times. Dave Gunther bettered his scoring average against the Bucks, contributing 23 points, high for both teams.

Jerry Lucas dropped in 30 points as the freshmen downed the junior varsity, 103-62.

Mel Nowell thrilled the crowd with a number of outstanding passes which left his teammates open for numerous shots.

On the Gym Scene . . .

## Spartans Are Next Buck Foe

By John Auble Jr.

Now that the Finland squad has department for new colleges and universities, the scene around the

Men's Gym is one of extensive training as the Buck gymnastic team prepares for the Michigan State Spartans this Saturday.

Coach Joe Hewlett's squad will be striving hard to boost its two win record to three.

THE SPARTANS, however, have other ideas. The 1958 National collegiate co-champs are willing and able to provide top competition if the situation demands.

From the looks of things, the Spartan-Buck meet should shape up into one of the best of the season.

The Bucks, perhaps, have the edge in the trampoline department with Nat Smith, Tom Gompf and Ron O'Brien who copped the NCAA crown in this event for the last two years.

ALTHOUGH reports from Michigan State on the individual merit of the gymnasts have not been received, the Buck coach seemed confident when he said, "they'll be the roughest we've ever met."

A silver lining to the Ohio State squad's dark Michigan cloud is the fact that Bruce Donaldson will be able to participate.

Donaldson was kept out of the first two meets due to a thumb injury, but reports from trainee Ernie Biggs say that he will be ready.

ALSO AN important factor in the outcome of the meet is that the Spartans will be performing on the Buck court.

Concluding, Hewlett stated, "the men have their routines down well but they will strive to make them more difficult. The thing that will beat Michigan State Saturday will be difficulty."

SPORTS WHIRL . . .

## McHale Cops Brave Job; Brown To Fight Elorde

John McHale of the Detroit Tigers will take over the general managership for the Milwaukee Braves. McHale is one of the youngest top executives in baseball at 37 years old. McHale, in leaving the American League Club where he was named general manager early in 1957, replaces Milwaukee's John Quinn. Quinn resigned to accept a similar position with the Philadelphia Phillies.

World Lightweight champion Joe Brown of New Orleans had been offered \$50,000 tax-free to defend his title in Manila against Flash Elorde of the Philippines.

## Sports In Spots

Welcome back the name of John L. Sullivan to boxing; this one is Ft. Ord, Calif., lightweight, and he won the Wisconsin state championship for three straight years. . . Advanced and beginning wrestlers at Ohio State are urged to sign up before Feb., 2nd for a wrestling tournament. A weigh-in will be held at 5 p.m., on this date, and anyone wishing to register before then is asked to go to Room 250 of the Intramural office at the Natorium . . . Before we forget, the Lantern sports staff would like to thank all those concerned that contributed in making the Finnish Gymnastic Show one of the greatest athletic events of 1959 . . . Ohio State's Dr. Bruce Bennett has been named executive secretary to the Ohio Intercollegiate Hockey Association. Ohio State's hockey team ranks third in the Association Standings, behind Penn and Dennison.

## Winding Up Loose Notes

The newest hero in the 1958 Masters Champion is Arnold Palmer. The 29-year-old former National Amateur Champion from Latrobe, Penn., staged a great come-from behind rally to win the \$15,000 Thunderbird Invitational Tournament Sunday.

Cincinnati Redlegs pitcher Don Newcombe went on trail in Newark, (New Jersey) today, charged with atrocious assault and battery, in connection with an alleged dispute in his tavern.

The holder of the World record for the mile, Australian Herb Elliot, has failed in his latest attempt to again break the 4-minute mile.

## Kuharich Adds Redskin

Joe Kuharich who is now coaching the Notre Dame football team is adding one of his assistants on the Washington Redskins to his staff at the Irish school . . . Skier Chuck Ryan of St. Paul, Minnesota, had to do some quick thinking recently at a ski meet in Duluth, Minnesota. Ryan, after he left the jumping slope, heard the crowd roar because he had lost his skis, or, as Ryan said later, "I just jumped out of them." Ryan figured the only thing to do was to come in like a baseball player sliding into 2nd base. He did, and it was quite a slide. He wound up about 250 feet from his takeoff point, after traveling about 150 feet in the air.

TWO FOR MR. ROBERTS—Ohio State's Joe Roberts (14) leaps high to drop in two points against Iowa last night. The Hawkeye's Clarence Wordlaw tries to block the shot, while Dave Gunther (25) looks on. Ohio State beat Iowa, 86-72. Photo by Mike Traub

## 'Ohio Sports Hall of Fame'

By now you probably have heard about the "Ohio Sports Hall of Fame" proposed by Paul Hornung, Dispatch sports editor. I think it is a wonderful idea, and realizing that quite a few former Ohio State greats would be enrolled, why not take time to drop Hornung a line and back his suggestion? Hornung, sports editor for the Lantern in his collegiate days, says, "No state, not even the fabled Texas, ever more deserved to have its athletic immortals and their deeds recognized with proper dignity and permanence than the grand State of Ohio."

**PEEP SHOW**—Damage to the interior side of the wall is inspected by John Birle after the furnace reached the 1600° mark.

## Research Engineers Have Full-time Work Burning Down Wall

Early one morning a few weeks ago, a crouching figure lit a gasoline-soaked torch in a campus building. He put the flaming mass into three small openings of a brick wall. Immediately, a blast of flames shot up and a roaring fire responded to his actions.

In a matter of minutes, a 20-foot section of an interior steel wall in the University's Engineering Experiment Station was covered with an orange and blue inferno. The flame leaped up to the second story of the building and the brilliant blaze glared out through the windows.

Residents of Woodruff Ave. spotted the fire quickly, but they just ignored it. The Engineering Station's neighbors are already well-conditioned to the little acts of arson committed there.

Most of them know about the work of the University Building Research staff and walls they burn down. But sometimes, unsuspecting passers-by get a whiff of the smoke billowing out of the windows and set off a three-alarm fire with the Columbus Fire Department.

These little incidents have been going on for at least 30 years; that is, if you consider burning a 20 x 20 foot wall to a crisp as a passing matter of fact.

The object of the Building Research staff is not merely to burn a wall up, but to see just how much heat it can take and for how long. Yet, even the walls that pass the tests with blue ribbons look like a bride's first attempt at making toast. Mrs. O'Leary's cow would be proud of their efforts.

Walls of all makes and kinds are run through the test furnace. They range from wooden frame type of construction to heavy brick and concrete structures. The walls must conform to a variety of standards in the test. The standards are based on the regulations of the American Society of Testing Materials and other national, state and municipal organizations that draft building codes.

The temperatures and running time of the tests vary according to the function the walls must meet in the actual building site it is intended for. The total testing time for walls range from a half-hour to eight hours. During this time, temperatures rising to 2300° F. are reached.

These tests have revealed that no wall is fireproof. They all have the ability to contain a fire of a certain temperature for a limited time. The tests therefore, reveal the amount of fire resistance in walls and the materials used in them.

Story and Pictures  
by  
John Oravec

**SMOKE HOUSE**—White smoke billows through cracks at the base of the wall at the half-way point of test. Ralph Robins (left) and Richard Bletzacker, director of the Building Research staff, prepare to inspect the damage.

**SECOND GUESSERS**—The sponsors of the wall, who baby their guinea pig through every phase of the test, get together with the research engineers to hash over the blueprints of the construction. —>

**BATTLE OF THE BULGE**—Measuring the deflection of the exterior side of the wall are Richard Bletzacker and Joe Marks. The heat of the fire causes the wall to bend and bulge which in turn weakens the structure of it.

**RECORDING THE ACTION**—Temperatures are recorded in correlation with the running time of the test by Ralph Robins and Charles Miller (both seated). Representatives from the company that is sponsoring the wall in this test check over the data.

**PPSSSSSSSSSS**—The climax of the test comes with a fire hose shooting a torrent of water on the white-hot wall. The ability of the sizzling wall to withstand the pressure of fire hose is also a part of the test.

# 'Rose Tattoo' Lead Is Challenge, Says Politis

"It's probably the greatest challenge I've ever faced in an acting assignment."

This was the reaction of Irene Politis, A-4, when she learned she had been cast as Serafina, the female lead role in the Strollers' production of "The Rose Tattoo."

"The part popularized on the screen by Anna Magnani is one every actress dreams of playing," she stated.

Miss Politis is active in several campus organizations, including Drama Board, University Players, and Sigma Epsilon Phi. She has appeared in such University productions as "Private Lives," "Antigone," "Misalliance," "Guys and Dolls," and "South Pacific."

When asked about "The Rose Tattoo," Miss Politis excitedly replied, "It's a play for everyone to see. It shows real people—their fears, emotions, hopes and dreams. The experience of seeing these people live is quite worthwhile."

The play will be presented Feb. 13 and 14 in University Hall.

Irene Politis

## Survey Town Room Needs

The Student Affairs Committee of Ohio Staters, Inc., is trying to determine if there is a need for a room where town students may study or relax between classes.

Students who reside in Franklin County are invited to aid the committee in its study of this problem by taking their ideas and comments concerning the establishment of such a room to the Ohio Staters office in the Ohio Union, or to Cyrus H. Sedgwick, assistant dean of men, in room 309, Pomerene Hall.

Among the questions the committee wants answered are the following: (1) Is such a room desired? (2) Where should the room be located? (3) How much would the room be used? (4) Who would be willing to help in an effort to provide such a room?

## Radio Station Changes Time

Radio Station WOSU-AM will change its sign-off time from 6:30 p.m. to 7:15 p.m. on Sunday, Feb. 1.

The Ohio State station shares the 820 frequency on the radio dial with two Texas stations. The educational station is required to sign off daily at sunset, Texas time.

As the days become longer, WOSU sign-off time is advanced until mid-summer, when the station leaves the air at about 8:30 p.m.

## Mirror of the Campus

The Veterans Club has changed its meeting night from Monday to Tuesday. Meetings start at 7 p.m. in the Ohio Union.

Cantor Irving Schreier, Temple Tifereth Israel, Columbus, will speak at the B'nai B'rith Hillel Foundation's noon forum today. He will talk on "Jewish Music."

University Dames will hold their first meeting of the year today in the Youth Center at the Fairgrounds. Entertainment will include a fashion show.

Maurice E. Mettler, a graduate student of marketing, has been awarded the Robert W. Schiff Fellowship for the current academic year.

Announcement from Ohio Staters, Inc., states that its mobile ticket booth will soon be finished and that it may be used by any campus organization wishing to sell tickets on the Oval.

Coordination of Greek "Help Night" activities has been taken over by the Student Volunteer Services, a campus service group. This year, "Help Night," will be Feb. 10 for fraternities and Feb. 12 for the sororities.

Union Activities will sponsor a "Candlelight Inn" this Friday in the Ohio Union Ballroom from 9 to 12 p.m. Tickets for the dance are on sale now and may be purchased in the Ohio Union Ticket

Office or at the door. The Frances Caral Band will provide the music.

The Institute of Genetics will present Dr. Henry L. Plaine in a lecture this Friday at 4 p.m. in Room 331, Botany and Zoology Building. He will speak on, "A High Mutating System, Possibly Controlled by a Specific Suppressor Gene."

Students of Home Economics 580, a retailing course, will go on a field trip of Cleveland sportswear factories in the middle of February. They will view the Lampl Company and the Printz Biederman Textile Company. The purpose of the tour is to acquaint the students with the various production methods of young women's casual wear.

Ohio Union Activities will present for its next film fair this Thursday at 6 p.m. in the Conference Theater, "Inspiration," an experimental film, and "Glass and You," a color story of glass through the years.

## OHIO STATE OFFICIAL BULLETIN

This Bulletin will be the official medium for all authorized announcements. Faculty and students—especially officials of all organizations—are requested to look to the Bulletin for information. University officials and executives will be guided by the Bulletin in preparing for meetings. In the interest of efficiency and to avoid conflicts, the following announcement is made: No meetings or functions of any sort will be permitted or provided for either on the campus or in the University buildings unless authorized and announced in the Daily Bulletin. The University assumes no responsibility for unauthorized or unannounced meetings. Notices should be at the office of the Executive Dean, Special Services, not later than two days before the date of publication. Notices of Monday's Bulletin must be received Thursday morning.

## Wool Contest Nets Student Trip to West

By Kay Patton

"Breakfast in bed will be the greatest part of it all," said Joanne Hoffman, a home economics major, as she left Friday morning by TWA on an all-expense paid trip to Portland, Ore.

Miss Hoffman, a five-foot, five-inch sophomore, won the trip by placing first in the state "Make it Yourself With Wool," contest last year.

AT PORTLAND, she will be in competition with 18 other state winners. She sent her prize winning dress to Oregon last week to be judged.

The dress is a smart wool lace cocktail dress, lined with satin. With it she wears black satin pumps and long white gloves.

When asked how she happened to enter the contest Miss Hoffman said, "I love to sew and the trip sounded so good." The contest is sponsored by Ohio Wool Growers Association, the Wool Bureau and American Sheep Producers Council.

MISS HOFFMAN started sewing during her first year of 4-H work. "The first thing I made was a pin cushion and a tea towel. I got A's on them," she said.

Last year, Miss Hoffman entered the same contest and won a wool blanket for placing second in the junior division. This year she won over nine other girls in the senior division contest held in November. She was first in the state contest in December, winning over 13 other district winners.

THE NATIONAL winner will be announced today. She will win a two weeks vacation in Europe.

Besides being an excellent seamstress, Miss Hoffman likes to cook and play the piano. She is a member of University 4-H Club and Lutheran Fellowship.

## 4 Educators To View Issues

Two Ohio State professors and two recent recipients of the Ph.D. degree from Ohio State University will be featured at a conference on current problems and issues in education to be held Feb. 7 at Toledo University.

The conference will focus on educational problems posed by children who are unmotivated, underachieving, non-communicative, or emotionally and socially maladjusted.

Dr. Paul Klohr, assistant dean of the College of Education, will lead a discussion on curricular design. Dr. Collins W. Burnett, coordinator of student personnel for the College of Education, will lead a group discussion of classroom practices to meet individual differences at the college level.

Dr. Martha King, supervisor of instruction for Franklin County, and Dr. Bill M. Root, superintendent of schools in Upper Sandusky, will also serve as discussion leaders during the one-day session.

Dr. King has served as an instructor in the College of Education. Both Dr. King and Dr. Root received their doctor's degrees from Ohio State.

# Religion Ties In With Art, Chairman Says

By Janet Wilt

"The Religion-in-Life program is one of the most needed things on campus," said Program Chairman Nana Richards, Ed-4, as she outlined plans for the coming event.

"This year we are trying to get

Nana Richards

away from the idea of a 'week.' The events that take place Feb. 1 to 4 are highlights of the year-round program of the many student religious groups which include all faiths."

MISS RICHARDS first worked on RIL as a sophomore. "I became interested in the program through attending seminars and hearing the outstanding speakers of previous years," she said.

"Questions of a religious and philosophical nature are often foremost in the minds of students. Therefore, the RIL program has been designed to help students find their answers, and most important of all, to raise new questions," said Miss Richards.

"In this program the religious aspirations of man are related to music, the fine arts, literature, and the various academic disciplines and professions."

FOURTEEN nationally known speakers and many local religious

leaders will take part in the program. They have appointments in the dorms for discussions during the week.

"It's a great honor to have all the speakers here, but I could never put one facet of the program above another," said Miss Richards. "The Festival of Religious Music Sunday, Feb. 1, in Mershon Auditorium will be a most inspirational experience for any student."

Miss Richards said that she

would like to see a series of meetings initiated through RIL to tell students of religious faiths in other countries. She feels that such a program continued throughout the year would be very rewarding.

"Recognition should be given to Milton McLean, coordinator of religious affairs, Dr. William Tyznik, faculty advisor, and to the many students who helped with the program," said Miss Richards. "Its success belongs to them."

# Two Views Given on Nuclear Testing

By Carolyn Davis

The implications of nuclear testing, pro and con, were discussed last week at a meeting of students at the International Student Center.

Speaking in support of continuation of nuclear testing, Dr. William McNevin, Department of Chemistry, held that it would be tantamount to surrender if we stop testing as long as Russia holds its present point of view.

**OPPOSING THIS** view, Ed Wagner, Department of History, said that if we continue testing, it is likely that we will one day come to the realization that we have made a serious mistake.

"Russia's strength lies in its expression of its present philosophy," Dr. McNevin said. "Therefore we've developed a philosophy of readiness with respect to defense.

"We no longer have time to mobilize; we have to be ready. We are prepared to discover an approaching missile by the time it is half-way here and we can have the Strategic Air Command off the ground in two minutes."

**DR. McNEVIN SAID** that we have to accept the fact that nuclear elements are with us and here to stay. "We need to learn more from nuclear testing. If we were to stop testing now certain important factors would come up.

"If we stop now, Russia may go

on and learn what we don't know." He pointed out that we have to have protection for our civilians and we need to learn all we can.

Speaking against nuclear testing, Wagner said that the race for balance of power has become a race for the balance of terror. Both powers fear what the other will do and keep on testing.

**HE DISCUSSED** the moral issue involved. "The United States stands for democratic principles. Dulles has accused Russia of being atheistic and immoral. But he has not asked what the United States is doing. If we continue to meet force with force, we are doing exactly what Russia is doing when we accuse her of immorality."

Ironically, both men used two

similar arguments in support of their opposition views. They both admitted that the opinion on scientific data was cloudy.

**WAGNER SAID** that it would therefore be risky to take a chance by continuing nuclear testing. Conversely, McNevin said this gave us all the more reason for continuing tests to learn all we could about the use of nuclear power.

Each speaker also pointed to the political implications of our action to small countries. McNevin implied that we must keep on testing to keep their support.

Wagner implied that to maintain their friendship, we must stop the tests because of the effects of testing and the threat fallout on their people.

## Petitions Ready For Service Unit

Petitions are available for Student Chairman and Assistant Chairman for the Student Volunteer Service Bureau.

The Bureau coordinates volunteer work between the students and community agencies including Help Night activities with the fraternities, sororities, and agencies.

To be eligible for these positions a student must have a 2. cumulative, be a second quarter sophomore and not be on warning by the dean of his or her college.

Petitions, available in the Student Senate Office, must be turned in by January 29.

The University of Akron is internationally recognized for its programs in rubber chemistry and research.

## Interracial Farm Is Topic

(Continued from page 1)  
Farms," Jordan stated that the idea for the farm came from the passages of the New Testament, Book of Acts. He continued that the people of the farms were to live as equals in brotherhood. They felt that wealth and possessions defined people as to rank and position so it was decided to hold everything in common for all, he said.

Jordan said that the farm's people feel a responsibility to their state and country, but in the last election they took no part.

The American Ceramic Society was organized in Columbus in 1898 and has maintained its headquarters in this city ever since.

## Clubs Allowed To Sponsor Politicians

The Board of Trustees recently ended a ban against political speakers on campus and authorized the Young Democrat and Young Republican clubs to each hold an annual seminar and dinner meeting featuring any currently prominent political figure of their choice.

Both of these organizations feel that this is a definite step toward higher and more enlightened political interest on the campus.

"**THIS IS A** meaningful move on the part of the Board, as it will definitely further the practical political education of the students," George Smith, president of the Young Republican Club, said.

"The college students on the nation's campuses, as a group, have an obligation to local, state and national government because of the higher education granted them," Joe Waterman, president of the Young Democrats Club said.

"These annual meetings, although just a start to what both clubs feel should be an entirely open campus in regards to political discussions, will be a vital factor toward better political understanding in the students," he stated.

**BECAUSE OF** the details involved in scheduling a well known political figure, neither club has made definite plans regarding the time and place of the seminars.

Both clubs intend to jointly publish and distribute a bi-partisan pamphlet to some 10,000 students, possibly juniors and seniors.

The pamphlet will be used as a means of information and promoting practical political interest in the clubs and the seminar.

### Math Club To Meet

A meeting of the Undergraduate Math Club will be held tonight at 7:30 in Room 329-G of the Ohio Union, according to Bryce Elkins, president.

## Get satisfying flavor...So friendly to your taste!

NO FLAT  
"FILTERED-OUT"  
FLAVOR!

NO DRY  
"SMOKED-OUT"  
TASTE!

Outstanding...  
and they are Mild!

See how Pall Mall's famous length of fine tobacco travels and gentles the smoke—makes it mild—but does not filter out that satisfying flavor!

HERE'S WHY SMOKE "TRAVELED" THROUGH FINE TOBACCO TASTES BEST

**1** You get Pall Mall's famous length of the finest tobaccos money can buy.

**2** Pall Mall's famous length travels and gentles the smoke naturally . . .

**3** Travels it over, under, around and through Pall Mall's fine tobaccos!
