TWO WINS PLACE BUCKEYES SECOND IN BIG TEN RACE

Week-end Victories Put Ohio State Next to Michigan in Conference Standing.

Purdue Game Comes Easy—Three Extra Frames Required to Win from Indiana.

BIG TEN STANDING

Team	W.	L.	Pct.
Michigan	5	0	1.000
Ohio State	4	1	.800
Iowa	3	1	.750
Illinois	3	1	.750
Purdue	1	4	.200
Wisconsin	1	5	.167
Indiana	1	6	.143

Game Friday
Ohio State 9, Purdue 3.
Games Saturday
Ohio State 7, Indiana 6 (12 innings).
Michigan 5, Purdue 3.
Illinois 11, Wisconsin 7.
Games Monday
Michigan at Iowa.
Illinois at Ohio State.

Ohio State's baseball team became more conspicuous as a strong contender for championship laurels in the Big Ten by coupling two week-end games, from Purdue and Indiana, on rival territory. Dopesters at the beginning of the season gave the Buckeyes little hope of carrying off the Western Conference flag, but have changed their minds and now have decided that the race lies between Ohio State and Michigan.

Credit for the 9-to-3 victory at Purdue can be given to "Lefty" Kime for his stellar mound work, striking out 16 Purdue batsmen, and to Slicker's double in the seventh which started a rally that netted Ohio State five markers. One run in the second and two in the fourth, while the Buckeyes could only mark once, gave the Boilermakers a 3-to-1 lead up to the fatal seventh. Slicker, the second Ohio batter up in this inning, poled out a double and scored when Barnaby booted McGee's grounder. McMillan was out on a fly, McGee going to third. Deutsch was hit by a pitched ball and followed McGee across the home plate when Kime singled over second. Barnaby muffed Ferner's hot drive, Kime going to second. Fish hit to right, but Hiser dropped the ball on Fawcett's throw-in, letting in two more tallies.

Error Helps Buckeyes
In the eighth inning, Barnaby pulled his third error in two rounds by juggling Fogle's grounder. McGee hit safe and McMillan walked, filling the

PROF. C. W. GAY NAMED AS PLUMB'S SUCCESSOR

Former Ohio State Professor to Return as Head of Department of Animal Husbandry.

Professor Carl W. Gay of the University of Minnesota has been appointed head of the department of animal husbandry at the Ohio State University, to take the place of Professor Charles S. Plumb. Professor Plumb will remain at the University, devoting most of his time to research work.

Professor Gay was at the University from 1905 to 1907 as assistant and associate professor. Since then he has had experience along animal husbandry lines at Iowa State College, the University of Pennsylvania, with the Pennsylvania livestock sanitary board, with the Pennsylvania department of agriculture and at Minnesota. He has written several books, among them "Principles and Practice of Judging Livestock," "Productive Horse Husbandry" and "The Breeds of Livestock."

Two degrees are held by Professor Gay, that of doctor of veterinary medicine, from Cornell, and that of bachelor of science in agriculture, from Iowa State College.

MASKED MAN ORDERS ALPHA PHI MEMBER TO THROW UP HANDS

Roused by a noise on the lower floor of the Alpha Phi House, Isabelle Stinchcomb, Ed-1, a member of the sorority, was confronted by a masked burglar Sunday at 2 a. m., who ordered her to throw up her hands. Instead, the girl screamed, arousing the other occupants of the house. The man made a get-away before he could be intercepted.

Residents of nearby fraternity houses were called to the rescue, and although a description of the man was given no trace could be found. No loss was reported, but the girls' loss of sleep.

COMPETITIVE DRILL DAY TO BE OBSERVED MAY 29

Best Trained Company in Regiment to Receive Prize Sword—Individual Medals to Be Given.

Competitive Drill Day will be observed by the cadet regiment this year for the first time since 1916. May 29 is the day selected for the competition which will be held on Ohio Field.

To determine the best drilled company of the regiment each company will stand inspection, execute the manual of arms and firing, and 15 company movements. Twenty minutes will be allotted to the exhibition of each company. The company judged to be the best drilled of the regiment will be awarded the prize sword presented in 1910 to the brigade drill corps by the class of '86. This sword is worn by the captain of the winning company until Drill Day of the next year at which time he receives a sword which he retains permanently. The Colonel Battelle prize sword for the best set up company for the year probably will not be awarded, for the new and ill-fitting uniforms make a decision of this kind practically impossible.

To the best drilled individual in the brigade will be awarded a gold medal to be retained by him until Drill Day of next year. A similar medal of silver will be given to the second best drilled individual. The judges of the day will be Major Frank B. Hawkins and First Lieutenant John B. Gowen of the Columbus Barracks.

The prizes are on exhibition in Hayes Hall together with a collection of war material received by the brigade from the federal government. The collection includes several shells ranging in size from an eight inch to the 37 mm. used by the French infantry, cannon, rifle and hand grenades, a Stokes trench mortar and Browning light and heavy automatic rifles.

EXTENSION WORKERS TAKE TRIP

Friday afternoon the home economics extension specialists and the home demonstration agents who held their semiannual conference on the campus last week, took a trip through Hamilton Township, Franklin County, to visit a well equipped farmhome and a poultry plant to illustrate the method of home extension. A luncheon demonstrating the use of dried fruit and vegetables and motion pictures on the use of photography and illustrative material in extension work were features of the week's program.

AG STUDENT'S FATHER DIES

Elmer B. Hukill, 58, died at his home, 50 East Lane Avenue, late Saturday of apoplexy. He is survived by his wife, one daughter, two sisters and two sons, one of whom is Harold R. Hukill, a junior in the College of Agriculture. The funeral services will be held Tuesday at 12 m. at the home, and the remains will be taken to Washington C. H., where services will be held at 2 p. m.

LIBRARY WILL CLOSE

The Library will close Monday at 5 p. m., due to the uncertainty of coal arriving. Reserve books may be taken out at 4 p. m. and returned by 8 a. m. Tuesday.

If this rule is to continue in effect longer than the one day, an announcement will be made later.

FINAL EXAMINATION SCHEDULE

June 2 to June 10

Classes	Time of Examination
All classes reciting Monday at 8 a. m.—Friday, June 4, 8 a. m.	
All classes reciting Monday or Wednesday at 9 a. m.—Wednesday, June 2, 8 a. m.	
All classes reciting Monday at 10 a. m.—Thursday, June 3, 8 a. m.	
All classes reciting Monday at 11 a. m.—Tuesday, June 8, 1 p. m.	
All classes reciting Monday at 1 p. m.—Friday, June 4, 1 p. m.	
All classes reciting Monday or Wednesday at 2 p. m.—Wednesday, June 2, 1 p. m.	
All classes reciting Monday at 3 p. m.—Monday, June 7, 8 a. m.	
All classes reciting Monday at 4 p. m.—Saturday, June 5, 8 a. m.	
All classes reciting Tuesday at 8 a. m.—Monday, June 7, 1 p. m.	
All classes reciting Tuesday at 9 a. m.—Thursday, June 3, 3 p. m.	
All classes reciting Tuesday at 10 a. m.—Monday, June 7, 3 p. m.	
All classes reciting Tuesday at 11 a. m.—Thursday, June 3, 1 p. m.	
All classes reciting Tuesday at 1 p. m.—Tuesday, June 8, 8 a. m.	
All classes reciting Tuesday at 2 p. m.—Tuesday, June 8, 10 a. m.	
All classes reciting Tuesday at 3 p. m.—Wednesday, June 9, 8 a. m.	
All classes reciting Tuesday at 4 p. m.—Wednesday, June 9, 3 p. m.	
Classes not otherwise scheduled—Saturday, June 5, 1 p. m.; Wednesday, June 9, 1 p. m.	

All examinations are given on the first lecture hour; in courses of wholly laboratory work, on the first laboratory hour. Conflicts should be reported at once to the registrar.

Please notify the registrar the dates chosen for examinations not otherwise scheduled, in order that there shall be no conflict in rooms.

SOCIETY CONDEMNS USE OF PLATINUM FOR JEWELRY PIECES

Ohio Academy of Science Which Met On Campus May 14-15, Urges Substitution to Relieve Shortage

Members Also Advise Conservation of Potassium Salts by Employment of Sodium Compounds.

Resolutions condemning the use of platinum in jewelry and urging the women of Ohio in the interests of science and industry to abstain from using this valuable metal of which the supply is so limited, were the most important discussions of Saturday morning's session of the Ohio Academy of Science which held its thirtieth annual meeting on the campus May 14, 15.

Industrial and educational chemists were urged to substitute sodium for potassium salts in order to conserve potash in another resolution passed by the academy. The work of the Ohio Biological Survey carried on by members of the faculty in biology of the Ohio State University was approved by the academy and interest and appreciation was expressed by individual members.

Elect Officers of Organization
W. H. Alexander, Columbus weatherman for the U. S. Department of Agriculture, was elected president of the organization for the coming year. Vice presidents chosen were: Frederic H. Kreeker, Ohio State University, department of zoology and entomology, zoology section; Professor C. H. Otis, Western Reserve, botany section; W. H. Bucher, University of Cincinnati, geology section; Dayton C. Miller, Case, physics section; Dr. Ernest Scott, Ohio State, Medical Science, and H. A. Aikens, Western Reserve, psychology section.

Re-elect Secretary and Treasurer
Professor E. C. Rice of Ohio Wesleyan, secretary, and A. E. Waller of

STROLLERS TO GIVE PLAY FOR BIG SIX TRACK MEN

Strollers will present "Phipps," a one-act comedy by Stanley Houghton, in the Chapel next Saturday at 7 p. m., for the entertainment of the men coming to the Big Six track meet.

"Phipps" is the story of a butler who falls in love with his master's wife, and of the comical positions into which he is forced during the course of his love. Georgea A. Backus will appear as the wife, Frederick Zint as the butler, and Ralph McCombs as the husband. An addition will probably be made to the program before its presentation.

The Columbus Dramatic Club presented the same play in K. of C. Hall in the fall of 1919 for the benefit of the poor children of Columbus.

MEN'S GLEE CLUB PRESENTS CONCERT OF VARIED NATURE

Audience of Over 1000 People Greeted Members at Home Musical Saturday Evening.

Individual Numbers, Group Songs, Quartet and String Sextet Win Special Applause.

Before an audience of over 1000 people, the Men's Glee Club presented its annual home concert in the Chapel Saturday night. The program proved a pleasing mixture of standard numbers, college songs and ragtime.

William P. Jenkins was compelled to respond to an encore after his interpretation of Handel's "Sonata D Major" and Beethoven's "Minuet." His performance was the more praiseworthy because of the fact that he played to the accompaniment of the shuffling feet and noisy movements of the late-comers.

The club won its first genuine burst of applause after the sacred number, "Open the Gates of the Temple," and from that point moved with increasing dash and spirit. The triumph of the evening was the singing of the cantata, "Lochinvar." The difficult transitions from one movement to another were capably done and the climaxes were moving in their strength and beauty. The solo parts were handled well by Nelson H. Budd and William J. Briggs.

Quartet Gains Applause
Comedy and harmony were admirably combined by the quartet, Frederick J. Zint especially winning new laurels as a comedian of originality and legitimate methods. The quartet was called back for two encores.

Charles R. Brokaw pleased the audience with his group of songs—Lully's "Bois Epais," Gounod's "Dio Possente" and Dix's "The Trumpeter." The first two were sung in French and Italian, respectively.

A ragtime novelty, which brought

LEGION PARTICIPATING IN NATIONAL DRIVE WEEK

National drive week of the American Legion, May 17 to 22, is being observed by the Ohio State post of the organization in an effort to obtain new members. At the election meeting Wednesday at 8 p. m., in Ohio Union, the University post will elect its officers and delegates for the national and state conventions. The national convention will be held in Cleveland in November and the state convention in Columbus in August. Regular delegates for the Franklin County conference will also be elected.

People outside the legion have been contributing to the memorial fund which is to be used to decorate graves in France. All contributions must be in by May 20.

SOPHOMORES VICTORIOUS IN ANNUAL TUG OF WAR

Second-year Squad With Only 29 Men Forces Freshman Team to Wade Through Mirror Lake.

The sophomores, with but 29 men on their end of the rope, forced 30 freshmen to take the cold waters of Mirror Lake during the annual tug of war Friday at 5 p. m., before a crowd of about 1100. The sophomore team was captained by Montgomery Campbell, while the freshmen were headed by Henry B. Young.

After the rope had been taken across, a dispute arose over the number of men to be used in the struggle, the first-year men declaring that 30 men must be used and the sophomores saying that the rope was long enough only for 29 men and that they would use only that number. The matter was settled by Henry C. Ohlson, sophomore coach, who declared that the freshmen could use 30 men and that the sophomores would start with 29 and add another when they got the rope. Dr. John W. Wilce fired the starting gun.

At no time during the contest were the second-year men in danger of losing, showing the result of the coaching in the "silent pull" system in which they were instructed by Mr. Ohlson. The freshmen lost by at least four feet, and with their entrance into the lake Coach Ohlson had piloted his sixteenth consecutive winning team. He has never lost a tug of war since he became a member of the University faculty.

Samuel Cobb, freshman coach, plunged in with the losers, thus setting a precedent for the coaches of all losing teams in the future. Mr. Cobb entered a well-instructed team in the race, but the superior system of the sophomores was always in evidence. Men's Student Council received \$169.20 from the affair. This amount and the proceeds from the cane rush and the frosh-soph basketball games are the only source of income that the council has. From its total receipts the council contributes to Boost Ohio, runs the different class elections and helps buy the freshman football and basketball jerseys.

ALUMNAE CHOOSE OFFICERS

The Columbus Woman's Panhellenic Association, made up of alumnae members of Ohio State sororities, held a luncheon at the Chittenden Saturday. Officers were elected as follows: Mrs. Martha Wright Miller, Alpha Phi, president; Miss Amanda Thomas, Delta Zeta, vice president; Miss Clara Rank, Phi Mu, secretary-treasurer; Mrs. J. Y. Levin, Delta Gamma, chairman of the cup committee; Miss Julius Christmas, Delta Zeta, chairman of the student loan committee.

MADE MEMBER OF BOOST OHIO

Martin R. Mansperger, Ed-3, was elected to represent the university Y. M. C. A. on Boost Ohio Committee at a meeting of the cabinet held Thursday and will take his place Tuesday, May 25. He is a member of the Methodist Student Council and Phi Kappa Tau.

MAY FETE MEMBERS REPORT

Miss Dorsey Fisher, May Fete coach, has called a meeting of the King's Court, including the Seasons and their page, and all of December except the children, Tuesday at 5 p. m. in the Woman's Union of the Home Economics Building.

ENGINEERS MAKE INSPECTION TRIP OF WESTERN PLANTS

Chemical Students Start Monday on Five-day Tour, Under Direction of Two Faculty Men.

Report of Investigation Required for Graduation Is to Be Made from Six Standpoints.

Twenty-four students in chemical engineering left Monday at 8 a. m. on their annual inspection trip, which will take them as far west as Chicago and cover a period of five days. The tour is a requirement for graduation of all students in chemical engineering, and the party is composed of 19 senior engineers, four graduate students and one senior in arts. Dr. James R. Withrow, assisted by Dr. Frank C. Vilbrandt, is the director in charge.

A total of 32 industrial plants in cities of Ohio, Indiana, Illinois and Michigan will be visited with the object of giving the students a practical knowledge of modern chemical industrial operations, of getting a view of the different branches of the professions of chemical engineering and industrial chemistry and of training their observation.

Name Plants to Be Visited
Among the plants which will be visited are: the National Cash Register Company, the Proctor & Gamble Co., Sherwin-Williams Co., the Standard Oil Company's refining plant at Whiting, Ind., Sears, Roebuck & Co. and the Ford Motor Works.

Upon the completion of the trip each student will be required to make a written report. These reports are to be made from the points of view of chemical and engineering processes of the plants visited; layout and elevation of the plant; machines, name plates and capacities; units operated and power required per unit; quality demanded by the market; laboratory special testing devices and finished products; plant and laboratory equipment suitable for addition to the Ohio State University prospective laboratory in industrial chemistry and chemical engineering. For this purpose the party has been divided into six groups and each group will make its report from a different point of view for each plant.

Students Who Will Make Trip
Those taking the trip are: Ralph D. Baker, Harry C. Howell, Marion W. Harmon, Fred V. Douth, G. Henry Katz, Russell F. Hamilton, Stuart Koegele, Albert S. Fultz, Ronald W.

GRADUATE STUDENTS RECEIVE FELLOWSHIPS

Board of Trustees at Monthly Meeting Names Six Fellows and Awards 13 Scholarships.

The Board of Trustees adopted the budget for the graduate school at its monthly meeting, Tuesday with the following as fellows:

Marie Drennen, D. Luther Evans, Samuel Morris, Gladys Ningear, Esther Reedy, Gertrude Williams.

Graduate scholars appointed were: Frances W. Ball, Miles Herbert Cagg, Marie Davis, Charles H. Fee, Emilie Harris, Fred C. Harrold, Ruth Loving Higgins, L. L. Huber, Mabel Marie Madden, Mary Florence McCracken, Ernest Rey, Edna Rickey, Thelma Sealock.

The fellowship of \$750 awarded each year by E. I. Du Pont de Nemours Co. was presented to Ora L. Hoover to become effective September 1. It was held by Charleton E. Curran.

SMALL VOTE FOR CANDIDATES

Voting for the Junior and Senior representatives to take part in the annual lantern ceremony, May 21, at 7:00 p. m. in the hollow, was very light up to noon, Monday. Only 56 girls had voted at the booths located in University Hall and the Home Economics Building.

Business Manager, W. VAETH BROWN '20
Today's News Editor, HELEN M. McVICKER Assistant, J. LIONEL ALLOWAY
Readers of The Lantern are requested to notify the editor of any mistakes in its columns

A DEAN OF MEN

Shall we have a dean of men? The question has frequently been brought up, discussed and dropped, only to be brought up again. Ohio State is almost an exception among universities of its class in not having such an officer.

A dean of men should, first of all, be a "real man"—one whom the students would be willing to follow and work with. He should be a vocational guidance expert, as one of his most important duties would lie in that field, and he should be broad-minded enough to see the whole University at any time, to see its needs and know how to remedy them.

In vocational guidance work the dean of men would be of invaluable assistance to the men of the University. Many students reach the end of their college career without any idea of what they are going to do or of what opportunities exist in various professions.

Putting men where they belong—showing them what lies before them in any vocation—this work alone should insure the dean of men a position in every men's college in the country.

At present, the men of the University have no one who is really responsible to guide them along a well-defined path. The deans of the colleges cannot do the work, because they are primarily engaged in other activities, and little cohesion or unity can be gained through their endeavors in this field.

A dean of men would not be a person to enforce regulations, to make rules or be a policeman; rather, he would be a rallying point for the men students.

Many things which are desired by the student body and which are not attained, have not been gained simply because of a seeming lack of interest on the part of these same students—the start is made, but no one keeps it going.

As the leader and adviser of the men, the dean would have it, in his power to keep things going.

ENCOURAGING WRITERS

Not one of the least pleasing signs of the times is the unusual interest being shown in college students desirous of making a profession or avocation of writing, by those already established in this fascinating pursuit. And it can scarce be denied that fewer lines of human endeavor offer the fascination which attaches to writing for publication.

Where this desire takes the form of newspaper work, every encouragement is offered the college man or woman in the newspaper office. The recent excursion of The Lantern staff into the realms of the Citizen is but one example of this.

And this helpful spirit is being manifested also in the more formal and imaginative branches of literature. The editor of Romance, a new publication which has already established itself in the reading hearts of a large number of people and which numbers among its contributors such well-known writers as Charles Neville Buck, Joseph Conrad and H. C. Witwer, has written the editor of one of the publications on our campus, requesting that there be submitted to him the names of students doing creditable work on campus publications.

It is his desire to get into communication with these students with the intention of having them submit to him their unpublished works. These will be carefully examined and where there is marked merit the manuscripts will be bought and published.

This practice will no doubt come as a big surprise to those who have al-

ways felt that magazines were published chiefly for the benefit of the editors' friends and that the works of beginners were never even given a reading.

The lesson of this all is that those students who feel the urge to express what is innermost in their hearts should take advantage of the opportunities they have to contribute to the publications on the campus, both because of the immediate benefits which will accrue to both the publication and to the writer and because of the possibilities which a career in the field of letters offer to the student in the days after graduation.

Taxes seem to be one of the main contentions in the world of affairs, and our interest in them centers around the hope that perhaps there won't be any by the time we've made a taxable pile.

In these days of agitation for shorter hours and a shorter week, Monday should be the first day to be lopped off the usual working schedule. Rain or shine, it's always blue.

With more cold weather on the way, those who persistently wear their heavies till June kick in with one more "I told you so."

After hearkening to the call of the wild for a few days, the most distasteful thing in the world is the call of the 8-o'clock.

Here's a fervent prayer that this reaches you at the same time the news of Ohio State's victory over Illinois does.

Our athletes were certainly busy in the interest of their Alma Mater over the last week-end.

One of the present-day inexplicable is the contour of the co-ed coiffure.

It's a great life if you don't week-end.

These Morbid Authors
Just finished another short story with an unhappy ending. The hero married the girl.

Carranza is said to have fled with 27,000,000 pesos. He could have changed them into a \$5 bill and saved weight.

KNOW OHIO

The Five Brothers

In the spring of 1891 the senior class, as is the custom of senior classes, discussed the question of presenting some sort of a memorial to the University. But that class had unusual difficulties in deciding just what form that memorial would be.

As the discussion took one form and then another and the weeks passed in endless discussion with apparently no prospect of an early agreement, five of the seniors in forestry conceived the idea of presenting their own memorial. Permission granted, they proceeded to procure and plant five elm trees in a circle near what is now the Long Walk and the walk to Orton Hall.

As they grew in size, the trees came to be known as the "Five Brothers," and their shade was often the retreat of "tired" students as the warm spring days came on. When the new walk was constructed to the Physics Building, it was laid in a curve instead of the usual straight line, to save the well-loved trees.

Now only the name of Frank William Lane remains in the memory of the present generation as one of the planters of the trees. Of the others, no record is present, and, incidentally, any news of them would be greatly appreciated by collectors of campus history. But whether or not the names are known, the trees themselves remain—one of the most beautiful and enduring memorials on the campus.

Ohio State in Prague
TO THE EDITOR OF THE LANTERN:
Ancient Bohemia and modern Bohemia of new Czechoslovakia is a beautiful country full of splendid people. Every day this is more and more impressed on us. A long half-day ride into the country on Sunday through clean, child-full village after another, through fields gloriously throbbing with growing life, looking over gorgeous vistas to far-distant ranges and gazing down into the juncture of the Elba and Vltava (Moldau) Rivers on their way to the sea, revealed all these things to us anew.

But the folks impress us, too, with their great simplicity, sincerity, great courtesy, lack of hurry, but demonstration of things accomplished everywhere, and their tremendous desire to always be learning, especially at the feet of America, which hasn't lost caste yet in this fair land.

Last night at the castle home of the Y. W. C. A. secretaries here the small American colony met to hear the new Czech constitution explained by one of the undersecretaries of the Czech ministry. Elections come for the Lower House next Sunday and for the Senate the next. Feeling is intense. In some sections there are as many as 15 political parties. All electors are required to vote. Suffrage is universal. The constitution is really very fine. A good many laws for internal government are still lacking so that the old Austrian ones are being used to cover unlegislated points. President Masaryk has just been, wisely, elected for life. . . .

Things are beginning to move in the student work. Yesterday things were closed up for a splendid castle out of town as a place for our first student summer conference and summer grounds for the Y. W. C. A. Today we are having a conference of the student staff to draw up general policies and, after that, we expect to move right ahead in our simultaneous national organization. Tomorrow night we have our second meeting with the group we presented our program to last week. On Thursday night we are having a social gathering for a group of 200 men students, who are living in what once was a prison. They are billeted there as in army barracks, eat there at a very low cost and, sometimes, very unenjoyable food. Since the first of January every man has been confined to his bed because of sickness at one time or another. The professor in charge is doing all he can for them and is very eager for us to come in with our program.

We are having translated Rauschenbush's "The Social Principles of Jesus," which will make our first study book. We hope to have a national student convention in May to draft a national student association constitution. Mott, Eddy and Davis will be here some time then. Must run to conference now and will finish this in a later note. We're hungry as can be for news from you all.

HUNTLEY.

April 13.

A Treasure House
TO THE EDITOR OF THE LANTERN:

When a student who has been in school all year told me the other day

that that was the first time he had been in the Library, I was distinctly shocked. I don't want to add to the burdens of the Library attendants by causing too large an increase in attendance, but there are so many things of interest and value which may be enjoyed in a few minutes' browsing in the periodical room that it is certainly a pity anyone should overlook them.

Here are a few that are too good to miss: A short article in the April Bookman by Ellis Parker Butler, entitled "A New Poet of Nature," is irresistibly funny. There's a treat in store for all who will devote 10 minutes to the perusal of that pathetic appeal, "Oh, Plant Me a Garden," and the somewhat defiant "Oad to a Stinging Nettle," both of which are quoted by Mr. Butler. "The Story of Opal," which began in the March Atlantic, is certainly a remarkable child's diary, abounding in a wealth of imaginative feeling and naivete which is delightful. If you read French and wish to understand the attitude of the French people toward America, you will be greatly interested in a sympathetic little story in the Christmas number of L'illustration, "Du Temps Quand les Americains Etaient Chez Nous"; if you don't read French, you'll enjoy the pictures. Another view, also very favorable to Americans, is given in Eugene Brieux's play, "Les Americains Chez Nous," which you will find in the theatrical supplement to L'illustration. This play, which is reviewed at some length in the April number of Current Opinion, created quite a sensation in Paris, and will probably be produced in this country next season. So if you're at all interested in Franco-American relations—and what former member of the A. E. F. is not?—this is your opportunity to get in on the ground floor; see if you think Brieux, who by the way is the creator of "Damaged Goods," has analyzed the situation correctly.

It is needless for me to cite any more treasures of the periodical room; anyone who can turn himself loose there for a while may find others which will appeal to him more strongly than those I have mentioned; besides, with finals approaching and campus activities pressing us as they are, it seems almost impossible to find time for "joy-reading." But if you can possibly do it at all, I'm sure you will feel amply repaid—and if you have to miss all the others, be sure and read "A New Poet of Nature."
A JUNIOR.

Would You Send a Twelve-Inch Shrapnel Shell to Reach One Man?

Or a Rifle Ball?

The shell costs \$540; the rifle cartridge 4 cents.

There are a lot of advertising media that loom larger and fill more space, but the real result—the capture of the buyer—is to be found in the publication which belongs to the class which your prospective buyer reads.

University students are primarily interested in their own newspaper. They want to know exactly what is going on around the campus.

The Daily Ohio State Lantern is the only official daily publication on the campus. Its energies are concentrated, localized, focused upon the object of getting news service to the reader.

Therefore, it is accomplishing large results for those advertisers who, realizing the power of this medium have steadily and intelligently made use of its pages.

Merchants can score direct hits on over 6000 buyers by properly using the Lantern. These buyers are spending over \$5,000,000 in the city of Columbus every year. Are you getting your share?

SOCIETY CONDEMNS USE OF PLATINUM FOR JEWELRY PIECES

Continued from Page One

The Ohio State department of botany, treasurer, were both reelected. Professor F. C. Blake of the Ohio State department of physics, and C. J. Schatzler of Wittenberg, were appointed to the executive committee. Professor Herbert Osburn was made trustee of the research fund. L. B. Walton, Kenyon, and F. O. Grover, Oberlin, were appointed to the publication and library committees respectively.

Members of the editorial board were reelected as follows: Professors R. A. Budington, Oberlin; Bruce Fink, Miami; G. D. Hubbard, Oberlin; S. J. M. Allen, Cincinnati; F. C. Waite, Western Reserve, and H. Austin Aikens, Western Reserve.

Graduate Student Reads Paper

Among the most interesting papers read at the sectional meetings held Saturday morning were those read by Swarna Kumer Mitra, an Ohio State graduate student before the botany section and two lantern talks by Robert H. Griggs of the Ohio Historical and Archaeological Society on the Katmai district, Alaska.

The session was opened Friday with a business meeting at 11 a. m. at Botany and Zoology Building. A luncheon was held for the members at the Ohio Union Friday noon.

Professor D. C. Miller of Case gave a lecture on "Photographing Sound Waves from Large Guns and Projectiles," which was of great scientific interest because of the experience of the late war in this branch of physics at the Friday afternoon session.

The section of physics dined at the Ohio Union Friday evening and following this Professor F. C. Blake, president of the academy, addressed the members on "The Einstein Theory of Relativity and Gravitation." Following this meeting Professors R. C. Osburn, Herbert Osborn, F. H. Krecker, J. E. Kindred, C. L. Turner, and Robert F. Griggs, exhibited rare specimens of scientific interest and demonstrated them at a social gathering at Botany and Zoology Building.

TWO WINS PLACE BUCKEYES SECOND IN BIG TEN RACE

Continued from Page One

bases. Huffman, batting for Deutsch, connected for a double, scoring the three men on bases. A fast double play by the Boilermakers retired the side. Miller went to the mound for Ohio State in the eighth and retired the Purdue hitters in easy fashion. Huffman worked behind the bat after the sixth inning. Fish covered the right garden.

Score:

Ohio State 0 0 0 1 0 0 5 3 0—9 8 6
Purdue 0 0 1 0 2 0 0 0 0—3 6 8
Batteries—Kime, Miller, Deutsch and Huffman; Wallace, Wagner and Roberts.

Beat Indiana in Twelfth

With the score 6 to 4 against them when they came to bat in the ninth, the Ohio State batsmen put across two runs, tying the score at 6-all, and after three extra rounds of hard baseball were able to drive in a run, resulting in a 7-to-6 decision over Indiana.

The Hoosiers scored their majority of runs in the third, four Crimson men crossing the home plate. Although Ohio State filled the bases in the fourth, only one run was marked up by the Buckeyes. Slyker walked; McMillan and Huffman both hit. Fish was out at first on a fielders' choice, but Slyker scored. Fenner was safe

at first. Kime drove a hot one over first base, which was caught by Right Fielder Schuler after a hard run, doubling Fenner at second.

Tie Score in Ninth

Ohio State's two runs in the ninth came when Kime singled and McNulty hit, both men scoring on McGee's grounder. The winning run came when Fenner singled and stole second, going to third on a wild throw. McNulty flied to the left garden, Fenner beating the peg home and scoring the deciding run.

The game was marked by ragged playing on both sides. Schuler and Dean played a great game for Indiana, the two men garnering nine hits. Huffman, McGee and Fenner were the Buckeye bright lights. Fish, while weak at times, pitched a good game of ball, holding the Hoosiers to four hits after the sixth inning. Kime played right field for Ohio.

REPRESENTATIVE WANTED

We need somebody, preferably a wide-awake college student, to represent us in each of the following cities: Columbus, Cleveland, Dayton, Toledo and Cincinnati, Ohio; Indianapolis, Indiana; Chicago, Illinois; Buffalo, New York, and Pittsburgh, Pennsylvania. We think we have a decidedly attractive proposition that would take only a portion of your time during the months of July, August and September. Commission basis and no experience needed. Write immediately for full details.

THE WING SEED COMPANY,
Mechanicsburg, Ohio.

line, the string sextet was called on time after time for encores.

Formal Program Concluded

The familiar "Dear Land of Freedom," from the opera of "Lucia," concluded the formal part of the program, and Frederick J. Zint led the audience in the singing of "Carmen Ohio." Speaking of the concert, Dr. Thompson said: "I enjoyed the program very much and consider the entertainment one of exceedingly high quality." It was the first home appearance of the club under the direction of Karl H. Hoenig.

The concert showed clearly the need for improvement in the stage facilities of the Chapel, as the slowness in the drawing of the large curtain was both an annoyance to the audience and the performers behind it.

Boxes were occupied by Dr. and Mrs. Thompson, Coach and Mrs. Frank R. Castleman, Professor and Mrs. Joseph R. Taylor, Mr. and Mrs. Carl E. Steeb and Mr. and Mrs. Julius F. Stonoe. Mr. Stonoe is a former University trustee.

The History of 6% Protection

An Insurance Organization Founded Upon Credit Service

IN April, 1919, Mr. J. B. Wolf, General Agent for the Missouri State Life, realized the culmination of his ideals in CREDIT INSURANCE. Like all big men who have vision, Mr. Wolf conceived this progressive service method—he foresaw the need of a practical system in the insurance business.

The Reasons for Credit Insurance Are Easily Defined as Follows:

THE war brought about a change. The whole world is operating under intensive systems of business. The manipulations today require every last fraction of financial resources. Especially is this true when expansion is such a vital factor in supplying the world's needs.

Why Do Men of Affairs Require Credit Insurance?

BECAUSE it permits them to insure themselves in sufficient amounts to fully protect their families and their business interests. A policy ranging from ten to a hundred thousand dollars would, under present conditions, be almost disastrous. Or if the money were paid in cash, would result in financial embarrassment.

ANOTHER PROGRESSIVE STEP
