Resolutions Are Adopted By Vet's Club

The University Veteran's Club has sent two resolutions to the Student Senate regarding racial discrimination and salaries of Student Senate officers. The first one is as follows:

Whereas, many of the University approved rooming houses engage in racial discrimination when renting to students.

WHEREAS, THE University has the delegated powers to require that certain standards be met by the rooming houses in which students live.

Whereas, the University doesn't approve of discrimination by race, creed, or color.

Be it resolved that the Ohio State Veteran's Club recommends that the Student Senate recommend to CSA that the University administration adopt the non-discriminatory standards to be met by rooming houses renting to students.

The second resolution, a result of recent Senate action eliminating certain awards, is as follows:

WHEREAS, THE Student Senate has eliminated certain awards for outstanding achievements in some student activities and maintains that the desire to do a good job should be an end in itself.

Whereas, the leaders of an organization should set the examples.

Whereas, the salaries of the Student Senate officers are as follows: one president, \$200; two vice presidents, \$150 each; five junior administrative officers, \$50 each. These salaries are more or less an award for the simple reason that they do not compensate for the amount of time and effort involved.

WHEREAS, THE elimination of

Sailing Club Head Denies Senate Claim

By Ron Bingaman

"Completely false!" said Dr. Robert S. Platt, advisor of the Sailing Club, in answer to charges that the club had held an unapproved regatta and party last weekend at the O'Shaughnessy Dam.

According to stories in yesterday's LANTERN and a down-town newspaper, the Sailing Club will be the subject of an investigation by student governing bodies.

PLATT SAID that a regatta was to be held this past weekend, but was cancelled. It is alleged that the club held the regatta in defiance of the University's ruling.

A check with the parents of one member, Jean Patricia Corcoran, Ed-3, revealed that club members and "sailor" guests from other schools held a party at the Corcoran home at 2014 N. Edgemont Rd. Mrs. W. P. Corcoran said that this party was approved through the Dean's office, and that she acted as chaperone.

CHARLES H. HUSTON, Law-2, another club member, said that he sent telegrams to the clubs which had been invited, notifying them of the cancellation. However, he said, some persons from other schools did come to Columbus in an informal status to use the facilities of the Ohio State Sailing Club.

JUNGLE DOCTOR—Dr. Tom Dooley, who spoke at Merston last night, believes in do-it-yourself foreign aid.

—Photo by Tom Calovini.

Dooley Discusses Work

One of the few believers in "do-it-yourself" foreign aid, Dr. Tom Dooley, devotes his life to living and working with wretchedness.

Dr. Tom, speaking at Merston Auditorium last night, said, "The success of American foreign policy depends on the images we create in the minds of the peoples of Asia."

SINCE HIS stint with the Navy in 1954, Dr. Dooley has helped and ministered to the starving and ill of Laos and Viet Nam.

Along the Red rim of tyranny in Viet Nam, Dr. Dooley has built hospitals and given hope to more than half the world's population that would otherwise never have seen a doctor in an entire lifetime.

"Our hospitals are not of the twentieth century variety," said Dr. Dooley. "We never put anything in a hospital that would be beyond the ability of the natives to maintain," said Dr. Dooley. "We

are not trying to build an American dynasty in Laos; nothing can undermine the character of a nation like gifts for relief."

FOR ALL the people in Laos, there is just one physician. In his hospital, equipped with a kerosene stove, and one electric light for operations, Dr. Dooley and his staff of 27 treat 100 patients a day and have vaccinated all of the 14,000 valley people.

"I am trying to show them something of Americans besides guns and fighting. I am trying to show them the hands and hearts of America," Dr. Dooley said.

FOUNDER OF Medico, designed to raise money for hospitals and medical services in Southeast Asia, Dr. Dooley's lecture tours in the United States have brought thousands of dollars for this work.

In a plea for help to the Merston audience, Dr. Dooley received \$1,291 for his people.

NROTC Commander Retires After 29 Years in US Navy

Capt. Charles E. McCombs will end his last tour of duty this Saturday.

Capt. McCombs, USN, Professor of Naval Science and commanding officer of the Ohio State NROTC Unit, will retire from active service this week.

"THIS IS the tour I dreamed of as a graduate student here in public administration in 1947-48. I watched the NROTC Unit grow at Ohio State and it was from here that my son was commissioned in the Marine Corps."

"It has been a very satisfying and interesting tour. I have enjoyed my association with the midshipmen and it is with the youth that I wish to work in the future," said the Captain. "The Unit has grown. There are more men, activities and courses have improved, and are more rounded."

Capt. McCombs will be relieved by Capt. Thomas D. Keegan, USN, of Brooklyn, New York, at a change of command ceremony in the French Field House Friday evening.

UPON RETIREMENT Capt. McCombs will be advanced to the rank of rear admiral.

Capt. McCombs, a native Buckeye, along with the other two heads of the University's military departments, graduated from the Naval Academy in 1930 and in 29 years has served aboard all major types of ships.

"For extraordinary heroism," the Captain was awarded the Navy Cross as commanding officer of the USS Monssen during the third battle of Savo Island in World War II. "I am only the custodian of the medal . . . it was won by the crew and officers, more than half of whom were killed in the action."

MEMORIES FOLLOW the Captain. Service with Admiral Halsey, Admiral E. J. King and Admiral Nimitz . . . "the most distinguished and able officers I know and with whom I have served."

There was his participation in the Guadalcanal-Tulagi landings. And the plaque made of a worn stool seat from which Capt. Mc-

Kaiser, USW Sign; 2nd Firm 'Wavering'

PITTSBURGH—(UPI)—Major steel producers now face renewed company-by-company negotiations with the United Steel Workers Union under increased pressure of a separate agreement by Kaiser Steel Corp. and an imminent court ruling on the union's Taft-Hartley injunction appeal.

Open Meeting Set to Discuss Racial Bias

By Don Bandy

An open meeting to discuss discrimination on the campus will be held Thursday in the Ohio Union by the Human Relations Subcommittee of Student Senate.

Niki Schwartz, chairman of the subcommittee, said that anyone can attend the meeting.

"WE KNOW that there are discrimination problems on and off campus, and through the subcommittee, we hope to find the tools to solve them," he said.

The purpose of the committee is to implement human relations at Ohio State and to achieve the goals of 13 areas covered by the doctrine set forth by Student Senate in 1957.

The Senate doctrine covers admissions, scholarships, grants and loans, classroom procedures, student teacher training, University employment policies, student placement, campus housing and boarding, off-campus housing and boarding, health facilities, athletics, recreation, student groups representing the University and restrictive clauses in student organizations.

"BUT, FOR right now, we are mostly interested in the areas of housing and student activities," Schwartz said.

The 1957 doctrine was a result

(Continued on page 8)

Kaiser, the nation's 13th largest steel producer, reached agreement with the steelworkers in day-long negotiations in Washington yesterday.

Although the remaining major steel firms remained, on the surface, adamant in their joint stand against the union demands, there were reports that another firm was ready to sign a separate agreement.

ANOTHER ROUND of separate talks between company negotiators and the union was scheduled at 10 a.m., EST, today, in a race to beat the Appellate Court's decision on the union appeal of the Taft-Hartley back-to-work provisions expected some six hours later. The U.S. Third Circuit Court of Appeals said it would rule at 4 p.m.

Edgar F. Kaiser and USW President David J. McDonald, who announced the settlement, agreed that the two-year contract provided 22½ cents an hour in wages and benefits.

KAISER SAID the cost to his firm in the first year would be 10 cents an hour in insurance, pension and supplemental benefits. There will be no wage increase the first year.

The agreement provides a 12½ cent wage increase in the second year. It includes a 3.44 cent cost of living boost.

STAFF TO MEET

There will be a meeting of the Arts College faculty Thursday, Oct 29, at 3 p.m. in room 100 of the New Physics Building.

CLEANING UP DESK—Captain McCombs takes care of last minute details before his retirement.

Let's Have More

"Stimulating... definitely worthwhile... wouldn't hurt to have more..."

These are only some of the comments made by students who attended sessions of the intellectual conference on Darwin, Marx and Wagner held at Ohio State this past weekend.

A lot of students were on hand for each of the four sessions. Some had cut classes to attend, others got permission and still others were required to attend.

But it shows that there are intellectual-minded students at Ohio State. Two students, who couldn't get seats, stood throughout one session and at the same time took notes.

This should be rewarding to the Graduate School, which sponsored the conference. Already plans are in the air to have another conference of this type next year.

The conference, second of its type, was held to provoke more of an intellectual trend on the campus. The committee worked day and night since April planning it. Experts on the three subjects were here from all over the United States.

Program chairman Dr. Henry L. Plaine deserves an extra pat on the back for his work on the conference. Since Sept. 1, he averaged only three to four hours sleep a night.

And the student response to the conference was tremendous. Carol French, a music graduate student, said she attended the Wagner session because of her interest in music and that she is thinking of writing her thesis on the musician.

Robert Voll, a sophomore in psychology, also said he attended some of the sessions on his own accord. "It was stimulating, rather deep at times, but definitely worthwhile," he said.

Nichols Peterson, also a psychology major, said he took notes at the sessions he attended in order to refer to them later. "It gave me plenty to think about and no one could help but learn something from the lectures," he said.

"A conference like this is an interesting experience and can lead a person to investigate more on the three men," said Bram Dijkstra, a sophomore from Holland. "It was a nice surprise to see so many American students at the conference," he added.

Although parts of the conference were deep and hard to grasp, according to some students, it was gratifying to hear them say "we need more of this at Ohio State... more students should have taken advantage of the sessions... the conference was inspiring... the conference can lead a person to read good books..."

It is encouraging to note that some departments are planning to bring other speakers to the campus to develop some of the ideas explored during the two-day meeting.

Although it takes much work and planning to hold a conference of this nature, we would like to suggest the possibility of having at least two a year.

One could be held in the fall and the second in the spring. Also, it would be worthwhile to consider holding a conference of this type aimed directly at the student.

Education

The nation's colleges and universities are paying increased attention to secondary and even elementary education, according to the annual report of the Carnegie Foundation for the Advancement of Teaching.

The report says that early and continuing efforts should be made to identify academically talented children. Also, the report calls for greater communication between the universities and the rest of the nation's educational system.

Republic Divided . . .

Reds--Nationalists Ready To Square Off for Iraq

BAGHDAD — (UPI) — Iraq's Communists and the increasingly powerful Nationalists have squared for what may prove to be a decisive battle for control of this politically-divided desert republic.

The Communists retain their hold on most government functions but indications were that they have suffered a serious loss of popular support.

THE NATIONALISTS, on the other hand, have gained considerable popular backing. Sharply divided in the past on the issue of whether or not to swing in with the United Arab Republic's President Gamel Abdel Nasser, the Nationalists now were believed strongly united by the campaign to sweep out the Communists.

Premier Abdel Karim Kassem undoubtedly has lost both popularity and prestige in Iraq and the rest of the Arab world.

Experienced observers estimated that at least eight out of every 10 Iraqis now oppose the government for a variety of

reasons, both political and economical.

THE SAME observers peg Communist strength at less than 10,000 out of a population of nearly seven million.

Informed sources said the Nationalists recently organized a "central committee" rally to support an anti-red government. The same sources said the Nationalists, taking their cue from past Communist successes, have begun the organization of cells and an underground arms supply route to enable them to combat the Reds at their own level.

The sources said the Nationalists were receiving large quantities of arms through Kuwait and Syria.

KASSEM, WOUNDED in an attack on him and scheduled to leave the hospital any day now, was biding his time, apparently still convinced he can maintain his shaky control by balancing the Nationalists against the Communists, a technique which so far has resulted in 15 months of internal political strife.

Political observers were doubtful of Kassem's ability to continue his so-called neutralist policy.

They believed last month's execution of 13 Nationalist army officers and four civilian officials of the old monarchy permanently alienated the Nationalists, who staged the first public demonstrations against the Kassem regime. Current support of Kassem by the Nationalists was believed to be merely a delay.

Red Sessions Open Today

MOSCOW — (UPI) — Nikita S. Khrushchev has returned home from a surprise "few days vacation in Romania" to prepare for the opening of the Soviet Parliament today and what is expected to be a major address on his recent tours abroad.

The Supreme Soviet (Parliament) will convene in the Kremlin in an atmosphere of optimism sparked by both Khrushchev's visits to America and Red China and Russia's economic and scientific achievements.

Under the Soviet Constitution, the 1,378-member Supreme Soviet meets twice a year. But this is the first meeting called this year and probably will last a week.

● Press reports said the meeting would take up:

● An economic plan and state budget for 1960.

● A new labor code with better rights and privileges for trade unions.

● Ratification of legislation enacted by the Presidium (ruling body) since the last parliament session.

Khrushchev is expected to deliver a speech assessing the latest international developments, particularly those connected with his American trip, visit to Peking and forthcoming meeting with French President Charles De Gaulle in Paris.

Summit Talk Needs Careful Preparations

BADEN-BADEN, Germany — (UPI) — West German Chancellor Konrad Adenauer has proposed a compromise on the timing of an East-West Summit Conference—somewhere between the December date proposed by President Eisenhower and the French demand to hold it next spring.

IN AN address to a Christian Democratic Party Convention in Baden-Baden, Adenauer stressed the need for careful Summit preparations and complete agreement on the part of the United States, Britain and France before meeting Russia. As he spoke, it was announced that he would visit France next month.

The Soviet Union wants a summit conference "the earlier the better." The United States and Britain want it in December. French President Charles De Gaulle is holding out for next spring.

"I personally doubt that the May-June term suggested by General Charles De Gaulle is advantageous," Adenauer said.

He added, "I would propose a date between the December date offered by President Eisenhower and the late May-June date, under the indispensable condition that there is an agreement among all Russian members of the Summit Conference and that the conference is most carefully prepared."

"WE ARE NOT inclined to accept the result of a Summit Conference which does not serve German interests," he said.

Adenauer originally was as cool as De Gaulle to a Summit meeting. He has veered the other way in recent weeks.

French Premier Michel Debre said in a statement at Tours, France, that Adenauer would visit De Gaulle in November, before the scheduled visit of Soviet Premier Nikita S. Khrushchev to the French Capital.

TRADE PACT

WARSAW — (UPI) — A 66-million-dollar trade agreement has been signed by Poland and Yugoslavia for 1960 under which Poland will export industrial equipment, coal, coke, rolled products, chemicals, drugs, synthetic rubber, textiles, sugar and household articles.

In return, Yugoslavia will deliver concentrated zinc ore and pyrites, colored metals and products made of them, rolled products, cellulose, leather, synthetic fiber and food products.

New Loan Fund Starts

Ohio State students may now borrow up to \$50 with no co-signers, interest, or service charges from the new "Ohio Staters Emergency Loan Fund." Established by Ohio Staters, Inc., the fund of \$500 is a result of the efforts of Keith Bandy, '58, and Jock Moody, Engr-5.

According to Rodney Harrison of the department of student financial aids, the fund "fills a growing need for such a loan system, and was established at a most opportune time."

This fund will also enable students to obtain money on very short notice to meet emergency situations.

Women Get More Swimming Courses

A study conducted during Winter Quarter, 1959, indicated that women's physical education courses could be reorganized.

Enthusiasm for swimming classes was lacking among Ohio State coeds during the last few years. Associate professors Jennette Stein and Mary Yost decided to find out why.

"WHEN INTEREST in something as crucial to summer activities as swimming lags it is important to get at the reason," said Miss Stein. "Swimming proficiency is not required of women students at Ohio State as it is of the men, and since swimming is necessary to take part in so many summer social activities, it seems important that we attempt to teach in accordance with the needs and desires of the students."

A questionnaire concerning swimming ability was distributed to all women students enrolled in required physical education courses during the Winter Quarter last year. Of these questionnaires, 2,194 were answered and returned.

Eighty-four per cent of the students answering the questionnaire stated that they were competent swimmers; 432 coeds said they could swim approximately the distance from 15th and High to the stadium, or the equivalent of ½-mile.

ONLY 364 women stated that they could not swim at all. Of these, only 62 said they did not swim because they were afraid of the water.

Ninety per cent of the coeds not enrolled at that time in a swimming course at Ohio State said that either they could swim well enough for their own purposes or that they would rather take some other physical education activity. A few did not like swimming at all.

As a result of this study the physical education department is now placing more emphasis on, and giving more time to advanced swimming courses. This will better accommodate larger numbers of students who can already swim before they enroll at Ohio State.

CURRENTLY, beginning, ele-

mentary and intermediate swimming courses are offered for the novice and the slightly competent swimmers. Two hundred fifty are enrolled in these courses this quarter.

Springboard diving, synchronized swimming, and life saving are offered to the more competent swimmers. There are 120 students now enrolled in these courses.

"We will go even farther in the coming Winter Quarter toward offering a greater number of advanced swimming courses," said Miss Stein. "When swimming in cold weather it is necessary to keep warm by your own effort," she continued. "Since most of the beginning courses emphasize learning to float, which takes very little movement and therefore gives very little warmth, mainly advanced swimmers who are capable of vigorous movement in the water will enroll in swimming classes."

Weill Lecture Is Scheduled

Mme. Adrienne R. Weill of Paris, will open the 1959-60 Graduate Engineering Lecture Series at Ohio State, with her talk on "Hardness of Metals—Hardness of Crystals" today.

The series is sponsored by Ohio State's Graduate School and College of Engineering. Mme. Weill will speak at 4 p.m. in room 207, Chemical Engineering Building.

Mme. Weill is an authority on the physics of metals. She is an engineer for naval ordinance and construction in France, and also holds the honorary post of technical consultant to the laboratory of the Louvre Museum.

Her work has included studies of ancient metals, as well as metallurgy, crystal growth, X-ray diffraction and spectroscopy.

She graduated from the University of Paris and began her career in research under Mme. Marie Curie.

Dorms Set For Active School Year

By Carole Lusch

Now that the freshmen are reasonably well settled and the crowded conditions have been relieved, somewhat the big word in the dorms is "organization."

Most of the halls have elected their senates or councils to deal with the routine problems of self-government.

SMITH HALL is still in the process of getting organized. Their constitution is finished and is now awaiting ratification.

Smith will differ in the titles of its governing body. What is usually called a council or senate will be known as a Board of Regents. The president will be Chancellor and will act as chairman of the Board.

According to Jim Noe, social chairman, election of the major officers will be made by the Board this year.

Next year, when the constitution has been ratified and basic organization completed the officers will be chosen from among all the dorm residents.

Siebert Hall is holding elections for a representative from each floor to make up its hall council. The social committee is also busy with plans for a winter formal.

Park Hall has tentatively planned a lecture series within the hall with speakers chosen from among the Ohio State faculty. The lectures will be held on Thursday nights.

MACK HALL is planning a Halloween Party for Thursday. Each corridor is invited to come in costume and present a skit. The skits will be judged and prizes awarded. Other social events in Mack include open houses after all the home football games and the promotion of exchange dinners with other residence halls.

The West Baker honorary for men on dormitory activities, "Le Droit d' Honneur," has been reorganized since it lost half its members when East Baker was opened this fall for women.

New officers for the group are Richard Mora, president; Robert Stevens, vice president; Steve Caldwell, secretary, and Ceci Sherk, treasurer.

The big question facing the men is whether or not to have one Baker Hall honorary with both men and women as members.

The Chinese learned how to make silk cloth 4,000 years ago.

Rocket Laboratory Does 'Wave' Report

The Ohio State Rocket Research Laboratory, a division of the aeronautical engineering department, will present a review of their research on the build-up process of detonation waves before the American Rocket Society in Washington, D. C., on Nov. 16.

This report was prepared by Prof. Rudolph Edse, supervisor of the laboratory; Loren Bollinger, assistant supervisor, and Michael Fong, a research associate.

THE RESEARCH involved igniting explosive gaseous mixtures in a closed tube and measuring the velocity of the flame as it speeds up to detonation conditions, and the velocity of the resulting detonation waves.

The measurements were made by an electronic chronograph which can record time intervals as small as one ten-millionth of a second.

According to Bollinger, the results of these tests are helpful in explaining rocket failures caused by explosions in their combustion chambers.

WHEN SCIENCE has found a means of controlling detonation waves, they can then be used as a means of propulsion. This advance will result in a reduction in the size of rockets because a smaller combustion chamber will be needed.

The laboratory is continuing these experiments. In some of the future experiments, the internal

geometry of the detonation tube will be changed by insertion of rods and cones.

They are also experimenting on the interaction of magnetic fields with charged particles ordinarily in the flame as it builds up to detonation conditions.

Besides Professor Edse, Bollinger, and Fong, the laboratory employs 17 part time graduate and students are in the aeronautical, mechanical, electrical and industrial engineering departments.

Twenty Girls Are Initiated Into Signets

The Swan Club synchronized swimming team, last week initiated 20 Signets in an hour-long ceremony followed by a party.

The Signets is an auxiliary group of the Swan Club and was formed last year. Its function is to aid girls in learning skills necessary to becoming a Swan Club member. Even though the girls do not have the full status of a Swan member, they participate in all of the club's activities.

The new members are: Ellen Boren, Janice Bucy, Janna Geisinhof, Grace Braimbipigj, Barbara Hahne, Liz Humphreys, Nancy Kohli, Laurie Mauritz, Lee Morgan, Kathryn Morrison, Jane Norman, Kathy O'Neil, Beverly Oetting, Marilyn Sheridan, Jaye Slaughter, Sandy Sullivant, Linda Swartz, Elizabeth Swhart, Pat Wallace and Judy Wolfe.

Girls who would like to become members of the Swan Club, but didn't have a chance to try out, may do so Winter Quarter when the club again will hold try-outs.

The club is now in the process of planning for the year's major activities which will include a pregame clinic with Michigan State's Green Splash synchronized swimming team Oct. 31, a picnic Oct. 24, a Florida Aquatic Forum Christmas vacation, and the annual Spring water show.

Annual Visit Set

The International Cabinet of the Ohio State YM-YWCA is sponsoring the annual "People Speak To People" visit to Urbana, Ohio, Nov. 6, 7 and 8.

At this visit international students are guests of residents of Urbana. During their visit, the students will stay in the homes of their hosts.

They will have the opportunity to visit a school in action, a manufacturing company, and a farm. They will also have a chance to see the American side of family life.

All international students are invited to attend.

Applications may be obtained by contacting June Diefenbach, program director, at the YM-YWCA, 212 Student Services Building, ext. 794, or by contacting Rao Sambasavarao, chairman of the trip, AX-1-1053 or ext. 529.

THE SHIRT THAT LOVES TO TRAVEL ...

Great for a weekend—travel light with an Arrow Wash and Wear "Time-Saver" shirt—just wash, drip-dry, and you're ready to go. Lasting fit in wrinkle-resisting 100% cotton oxford, broadcloth, or Dacron/cotton blend—all with the famous soft roll buttondown collar. \$5.00 up.

ARROW

Each Saturday see the NCAA football "Game of the Week—NBC TV—sponsored by ARROW.

'Telepuppets' Will Build First Space Platforms

WASHINGTON—(UPI)—Scientist Fred L. Whipple said recently that "Telepuppets" — remotely controlled robots with TV eyes—probably will build the first space platforms for launching expeditions to the moon and planets.

Whipple, director of the Smithsonian Institution's Astrophysical Observatory at Cambridge, Mass., said he doubts it will be safe or practical for pressure-suited human beings to do construction work in space. He described the Telepuppet in a report to the Office of Naval Research.

The Telepuppet would be "an instrument built to do the various necessary jobs, having television eyes and remote-controlled hands which will ape the motions of an operator." This would be similar to the "remove manipulators" used in radiation laboratories.

WHEN THE PUPPET fingers closed on some tool, a so-called feedback impulse would activate the human operator's manipulating apparatus so that he would "feel

the object" being handled by the robot.

If human beings were to build the platforms they would have to wear flying space suits which at best, Whipple said, "Would be highly uncomfortable and probably very dangerous."

"I have the feeling," Whipple said, "that these suits will be neither safe nor efficient. Sooner or later a small meteor, or more probably just the ordinary wear and tear of use, will rip the surface."

"IF THE SUITS are made extremely heavy they will become very awkward. I think they would always be as complicated, if not more so, than the heavy equipment used for deep-sea diving and will present the same type of hazards."

"Space suits can be eliminated by use of Telepuppets. Man is needed in space presumably, because he can exercise judgment and also because he cannot be jammed by radio counter-measures."

"But he does not have to be out working in a space suit."

Service Department Men Get Set for Busy Season

By Lenore Harvyasi

Ordering rock salt, getting snow plows in shape and repairing the heating plant are good indications that "Old Man Winter" isn't too far away.

These are some of the activities that the Service Department at Ohio State has been doing in getting ready for winter.

"ONE HUNDRED tons of rock salt have been ordered, but it won't be delivered until Nov 14," said Paul Elleman, director of the Physical Plant. Because the salt is stored under the stadium, it can't be delivered until after the last football game has been played here. During the snow season 20 tons of salt are used at one time to cover the entire campus.

When it begins to snow at night, while most students are still fast asleep, 40 men from the Service Department begin work at 5 a.m. Students arriving on campus early will find the walks cleaned by 7 a.m.

With four "V" shaped plows

pulled behind tractors, all the walks can be cleaned off in one and one-half to two hours. In 1956, there were 16 miles of walks, and since then at least one mile of walks has been added.

THE SNOW clearing operation does not end with the walks. Two truck-mounted plows clean off 13 miles of road.

There are still the finishing touches to be done. This consists of cleaning the steps of the buildings, which must be hand shoveled, the Mirror Lake area, the parking paths and ramps, and the cross walks where the plows have thrown snow.

The heating plant is another phase of winter preparation. All the cleaning and repair work on the heating plant is done in the summer, so that by Sept. 1 the plant is ready to furnish heat. The heating plant burns 65,000 tons of coal in one year. On a cold day the plant burns 350 tons.

HEAT IS brought into the buildings by approximately six miles of underground tunnels. These tunnels are large enough for men to walk through, which enables the lines to be serviced.

This central heating plant supplies heat to all the buildings on campus east of the river, and to part of the agriculture buildings.

OFF TO MICHIGAN—Students relax on the Ohio Staters train trip for the Ohio State-University of Michigan football game. This picture was taken during the last excursion.

Tickets Are Still Available On Staters Michigan Train

Tickets are still available for the Ohio Staters, Inc. train to Michigan for the Ohio State-University of Michigan football game on Nov. 21.

The tickets are \$18 and are on sale from 1 to 5 p.m. Monday through Friday in the Staters office in room 326, Ohio Union.

THIS PRICE includes round trip fare and the football ticket. Tickets are being sold only to Ohio State students on a first come basis. Over 600 tickets are available.

Sixty or more people can reserve a whole car. The train will leave the siding near the St. John Arena at 6 a.m. on the day of the game.

It will arrive in Ann Arbor at 10 a.m. and will head back to Columbus a half hour after the game.

THERE WILL be a cafeteria car connected to the train. Staters will provide card games and other entertainment.

There will be chaperones on the train and also a doctor and a nurse. Student conductors will also be

used. No alcoholic beverages will be allowed.

Ohio Staters has conducted this excursion for several years. A spokesman said, "By taking the train you have no parking worries, no driving to do and you get a good seat for the game."

Women students who plan to go will be required to submit a letter from their parents or guardian to the Dean of Women's Office or to the head resident of their respective living unit before boarding the train.

NO EFFECTS YET

The steel strike as yet has had no major effects on the University's building program, according to William E. Linch, University architect.

Linch said that most of the materials for the University's current construction projects were earmarked before the strike began. "However," he added, "continuance of the strike could delay some projects planned for the spring."

Team of Four To Be on TV

A team of four Ohio State students will challenge another college team on the CBS network's "General Electric College Bowl" Sunday afternoon, Nov. 15.

Members of the team representing Ohio State, who will match their knowledge with students representing other schools throughout the country, are Mrs. Elizabeth Norton, A-4; Molly Reynolds, Ed-3; Gerald Soliday, A-3, and Jon Townsley, Com-4.

THE WINNING team each week on the TV quiz program receives a \$1,500 donation to the scholarship fund of its university. Five hundred dollars is presented to the losing team for its university scholarship fund.

Nominations to the Ohio State team were received from the Dean's Office of each of the five undergraduate colleges. Members were selected on the basis of their wide range of knowledge.

Mrs. Norton is an undergraduate research scholar in comparative literature. Miss Reynolds is an English and mathematics major and a member of the Education Student-Faculty Advisory Committee. Soliday is a Merhson Scholar in history and German. Townsley, also a Merhson Scholar, is majoring in accounting.

UNIVERSITY OF Colorado, Southern Methodist, Swarthmore, Holy Cross, or Sarah Lawrence are possible opponents of the Ohio State team.

Mrs. G. Robert Holsinger, Jr., Assistant Dean of Arts and Sciences, will accompany the team to New York where the program will originate.

Robert Fulton built a submarine which he called the Nautilus.

Dismantling U.S. Exhibit Takes Time

MOSCOW — (UPI) — The American exhibit in Moscow was as big a job to dismantle as it was to set up.

More than a month after the exhibition closed, firemen, security police, plumbers and scrubwomen were still on the payroll.

Although the exhibit closed Sept. 4, parts of it were just being shipped back to the United States in October. The U.S. government was still paying bills, transferring buildings back to the Soviet government and squaring accounts with customs officials for items that will remain in Russia.

Maurice King, who supervised the job of dismantling the exhibition, said he had "tremendous cooperation" from Soviet authorities in disposing of the varied examples of American life and culture.

About 6,000 tons of equipment was shipped to Moscow for the exhibition, but only about 500 tons is being sent back to the United States. The rest was sold to the Soviet government, sent to the U.S. embassy or carted off by Moscow souvenir hunters.

King said Soviet customs officials had taken a sympathetic attitude toward the "missing" material. Much of it was in the form of books which visitors took home to read.

The Soviet government is paying \$375,000 for the big golden-domed main exhibition hall and the fan-shaped glass pavilion which the U.S. erected in Sokolniki Park. The Soviets expect they will come in handy for future exhibitions in Moscow.

Emptied of their glittering contents, the exhibition halls are cavernous and silent. During the six-week exhibition they bulged with visitors, and 2,750,000 Russians got the biggest chance in Soviet history to meet Americans face to face and see the trappings of life in the United States.

Swinging 4-H Group Enjoys Lots of Fun at Its Meetings

By Edward Block

"Swing your partner round and round." That's the sound heard at every University 4-H meeting.

This 4-H organization is one of the largest student organizations on campus with a membership of well over 200.

The club met in the H&F building for many years. With the completion of the auditorium in the Agriculture Administration building the meetings were moved to the new quarters. Since then there has been a steady increase in enthusiasm and membership.

A typical evening involves a short business meeting followed by group singing. Then the chairs are moved back, the square dance records are brought out and the fun begins. After a few dances, while everyone is catching his breath, refreshments are served.

Beside the regular bi-monthly meetings the club has a Christmas party with Santa Claus and square dancing to the tune of an orchestra. Also a weekend of camping each Spring Quarter at the 4-H Camp Ohio near Utica, Ohio, is enjoyed by the members.

The club sponsors a refreshment stand in the 4-H building during the Ohio State Fair. A large percent of the profit is given to the International Farm Youth Exchange program. This is a reciprocal program set up so that

farm youth may visit farms all over the world in an effort to increase peaceful relationship and better understanding.

Even though most members of the club are from the College of Agriculture and Home Economics there are many members from other colleges.

Anyone is invited to attend the next regular meeting Wednesday, Nov. 4, at 7:30 p.m. in the Agriculture Administration building auditorium.

A special bus leaves Bradley Hall at approximately 7:15 p.m. and returns after the meeting and recreational program has been completed.

Interviews Set By Humble Oil Co.

Representatives of Humble Oil & Refining Co. will visit Ohio State, Nov. 19-20, to interview job-seeking students who will graduate in engineering and science during 1960.

Students to receive any degree in chemical engineering or those in the advanced levels of chemistry, physics or mathematics will be interviewed for permanent employment.

Those interested should contact the Chemical Engineering Placement service in room 301 of McPherson Chemical Lab.

HE'LL BE GOING AT FULLBACK—Woody Hayes will call on another of his sophomores Saturday as 6 ft. 3 in. 211 pound, Roger Detrick will get the starters call to replace the ailing Bob White. Trainer Ernie Biggs reported that White will be lost for at least one week because of the shoulder injury he sustained Saturday.

Principle Of Gentleness . . .

Judo...A Philosophy of Life

By Allan Frankel

"Oaks may fall when reeds brave the storm."

This motto, taken from an old Japanese book, is applied by Judoists both to their sport and to their daily lives, believing that in competition as well as in everyday situations, that force can be defeated by yielding to it and turning it to one's own advantage.

THE WORD JUDO means principle of gentleness and is a philosophy of life closely related to Zen Buddhism. Jigoro Kano, credited as the father of modern Judo, summed it up when he described Judo as being maximum efficiency of mind and body which works toward the betterment of mankind.

Judo is one of the oldest sports in existence. Records of Judo contests date back to 720 A.D. It was

commonly known as Jujitsu then and is reported to have been first practiced by Samurai soldiers.

Gradually, numerous schools of Jujitsu grew up with each master teaching his own system. In the closing years of the feudal era, Kano, an 18-year-old student at the University of Tokyo, combined the various schools and molded the best aspects of each into a single discipline. He called it Judo.

ALTHOUGH it can be used for defense, Judo is primarily a sport, one depending on a combination of grace, balance, and control of the motion of the human form. A higher premium is placed on the development of concentration than in any other sport.

The popularity of the sport in America was boosted by soldiers, who were stationed in Japan and part of their military training.

WHITE BELT WINNER—Eugene Couch receives the trophy for the White-belt competition in the Judo club's invitational meet Saturday. Couch won three of his four matches to top his division.

No Joy in Buckville . . .

'We Go On from Here' Hayes Tells Newsmen

By Bill Teague

Coach Woody Hayes began his weekly talk to newsmen by noting, "It's a blue Monday."

He referred to the 12-3 loss at Wisconsin and to the bruised condition of his team. It was the third loss in five games and left the Buckeyes in poor physical condition for Michigan State.

ROUGH AND TUMBLE Wisconsin tactics put Bob White out of condition with a shoulder separation, gave Bob Ferguson a pregnant lip, Birtho Arnold a sore knee, Jim Tyreer a swollen ankle, Jim Houston a bruised shoulder, and Jim Herbstreit a bad hand.

Hayes said he expected everyone but White to be ready by Saturday, but noted that the other injuries would cause boys to miss valuable practice this week.

Looking forward to Saturday and the Michigan State Spartans, Hayes was not overly optimistic about the Buckeyes' chances.

"Michigan State has the greatest depth of backs of any team in the country, no question about it. Their line is aggressive and they have a good tough defense," Hayes said.

"And they're still in contention for the Big Ten title. They will have that as an added incentive."

INCIDENTAL INTELLIGENCE

—The Spartan squad lists eight boys from northern Ohio . . . perhaps another indication of Ohio State's sliding reputation in that area. One of them is Wayne Fontes, brother of Ohio State reserve fullback Len Fontes. You may recall that the Purdue roster listed 25 Ohio boys, and only five from Indiana.

After five games Ohio State is trailing opponents in almost every statistic except fumbles and fumbles lost. Ohio has lost 6 of 14 fumbles while opponents have lost 5 of 11.

The only creditable statistics are a 36.6 yards punting average (against 34.3 for opponents) and the fact that the Bucks have had only five interceptions while throwing 64 passes and completing 25 for 323 yards.

The Buckeyes have rushed only 760 yards while opponents gained 1,127 yards on the ground and 461 in the air. They've had the ball for 303 plays compared to 360 for opponents and made only 63 first downs compared to 85 by the opposition.

HAYES PRAISE — There was little to boast about in Ohio's defeat at Wisconsin, but Hayes lauded tackle Jim Tyreer and guard Ernie Wright (who made 12 tackles) for defensive improvement.

"Dick Anders, who made 10 tackles and looked pretty good on offense, was our choice as lineman of the week," Hayes said.

"There was no one who gave a particularly thrilling performance on Saturday," he added.

RECAPING the loss, Hayes said, "No one could question Wisconsin superiority. They capitalized when we didn't."

"That is not typical of an Ohio State team. Nor are the eight or nine mistakes we made typical. But those things happen."

"All we know is to go on from here. We plant to jack up our offense a bit," Hayes said. "I thought our defense was pretty good up there but we will try to improve that too."

NEW FACES in the starting lineup Saturday will be Tom Perdue at left end, Tom Matte at quarterback and Roger Detrick at fullback, unless Woody changes his mind on Wednesday—as he often does.

Busy Beavers

NEW YORK—(UPI)—City College of New York, which performed the feat in 1950, is the only school ever to win the NCAA basketball championship and the National Invitation Tournament the same year.

Baseball Nine Makes Plans For Spring

Although we still have half a football season and the entire basketball season before us, plans are now being made for the Bucks' baseball jaunt through the south this spring.

Marty Karow will take his squad to Rollins Park College in Winter Park, Florida, to participate in Rollins' annual baseball week. A seven game schedule is on tap through the week of March 21-26.

The Buck nine will play a pair of games with Rollins, Amherst and South Carolina. This will be the first time that Amherst has been a participant in the tourney.

Ohio State finished on top in last year's competition.

Navy Captain Will Retire

(Continued from page 1)

Combs fell while reviewing a navigation class in the Armory. The splintered remains were presented to him and are a treasured memento of the skipper's tour with Ohio State's midshipmen.

Saturday afternoons will find the ruddy Captain cheering on his favorite Buckeyes. Following a pre-Christmas trip to the South, Capt. McCombs will return to Columbus where the will keep a weather eye on grandson McCombs, who may make the Navy a third generation tradition.

Kenyon Will Host Soccer 11 Today

Coach Ursing's soccer squad will go after their first win of the season when they visit Kenyon this afternoon.

The squad dropped their fourth decision of the year Saturday to Pittsburgh 4-0, but Ursing reports that an improved offense utilizing a two-line system may prove the answer to bettering the Buck's record.

Goalie Jeff Howard made some great defensive saves at Pitt according to Ursing and Art Mayer and Larry Finkerbrine played their best of the year.

The team will be at home Saturday to host Akron at 10 o'clock.

Veterans Resolve

(Continued from page 1)

these salaries would save students approximately \$750 annually and also make the officership in the Student Senate an end worthy of itself without monetary awards.

Be it resolved that the Ohio State Veteran's Club recommends to the Student Senate that the plan eliminating the salaries of the Student Senate officers be adopted.

TODAY ON CAMPUS

This Bulletin will be the official medium for all authorized announcements. Faculty and students—especially officials of all organizations—are requested to look to the Bulletin for information. University officials and executives will be guided by the Bulletin in preparing for meetings. In the interest of efficiency and to avoid conflicts, the following announcement is made: No meetings or functions of any sort will be permitted or provided for either on the campus or in the University buildings unless authorized and announced in the Daily Bulletin. The University assumes no responsibility for unauthorized or unannounced meetings. Notices should be at the office of the Executive Dean, Special Services, not later than three days, excluding Saturday and Sunday, before the date of publication. Notices of Monday's Bulletin must be received Wednesday morning.

VOL. LXXIX NO. 32
TUESDAY, OCTOBER 27, 1959

Tuesday, October 27:

University Theatre Rehearsal, University Hall Chapel, 6:30 to 11 p.m.
Freshman Class Council, 100 Page Hall, 6:30 to 10 p.m.

SCHEDULES OUT

WINTER QUARTER schedule cards for regular students may be obtained at the students College Office as follows: A through K on Thursday, Oct. 29, and L through Z on Friday, Oct. 30. GRADUATE STUDENTS will obtain their schedules at the Registrar's Office: A through K on Thursday, Oct. 29, and L through Z on Friday, Oct. 30. Final date for filing for all students is Saturday, Nov. 7, 1959.

Law School Test

The Law School Admission Test is required of applicants for admission to a number of law schools including that of The Ohio State University. It will be given on this campus Nov. 14. Applicants must apply before Oct. 31 to be eligible to take the examination. Applications are available in the Registrar's office.

Institute Speech Features Wolken

"The Structure and Function of the Photoreceptor in Vision" is the title of a lecture to be given by Dr. Jerome J. Wolken at 8 p.m., Nov. 3, in room 132, New Physics Building.

Dr. Wolken, of the University of Pittsburgh, is known for his researches in vision and photosynthesis.

His visit and lecture are sponsored by the Institute for Research in Vision.

The lecture is open to the public.

Darwin's Grandson Predicts 'Return to Struggle for Life'

CHICAGO—(UPI)—Sir Charles Darwin, grandson of the best-known author of a "Theory of Evolution," predicted today that population pressure may force a "return of the old conditions of the struggle for life."

DARWIN, a theoretical physician and mathematician, included several grim predictions in a paper written for the Darwin Centennial Celebration at the University of Chicago on Nov. 24-28.

His grandfather's famous "The Origin of Species" was published on Nov. 24, 1859.

"Man can now aspire to the complete mastery of nature, but subject to the one condition that he can master himself," Sir Charles said.

Miss Nevert Yaghlian

Know Your Head Resident . . .

'Foreigner Treatment' Amuses Dorm Resident

By Phyllis Cashman

Perhaps the most amusing thing about being in America for Miss Nevert Yaghlian, a former English teacher in Jerusalem, is being treated as an ignorant foreigner.

Miss Yaghlian, who was born in Beirut, Lebanon, is the head resident at Bradley Hall this year. She has been in this country for only a year, but even before she came here she was fluent in the English language and familiar with American customs and ways of life.

BEFORE ATTENDING college, Miss Yaghlian taught school in Jerusalem and in Beirut, Lebanon. "Although I specialize in science and math, I taught almost everything including history and English in grades one through twelve in five different schools," she said.

While attending classes at Beirut College for Women in Beirut, Miss Yaghlian saw a poster explaining the personnel program in the United States. She applied and was accepted as a graduate resident at Ohio State.

Her first stop in the United States was New York City. "I had many childhood friends living in New York City," she said, "and there was no language barrier so I felt at home from the first day."

MOST OF Miss Yaghlian's campus interests are in connection with foreign student groups. She is vice president of the Arab American Association, has served on the program committee of the International Fiesta and Dancorama, and participates in YWCA activities as much as her busy schedule will permit.

Besides missing her family and close friends in Lebanon, the most serious void Miss Yaghlian finds in her life here is the lack of serious educational study groups and the opportunity to discuss questions pertinent to the human group with others. Recently she was asked to join a discussion group from the philosophy of education department which helps fill this gap.

During the one hour of free time each day which she averages,

The first subway was built in London about 100 years ago.

Iceland became an independent nation in 1944 when it severed its ties with Denmark.

Miss Yaghlian enjoys reading poetry, either American or Armenian authors and listening to classical music. Grieg and Stravinsky are her favorites.

FOR MISS YAGHLIAN, currently working on her masters in counseling psychology, this is a crucial year.

Teaching has always been her first love, and her job at Bradley Hall is basically an administrative one. According to Miss Yaghlian, though, it is also very much a teaching situation. "If I find that counseling fulfills my desire to educate, I may stay in this type of work," she explained.

Miss Yaghlian has found no difficulty in transferring her experience with foreign students to American students. Students, she feels, are the same everywhere—only the culture is different.

"I like to consider myself a 'friend to each student' in the sense of the Armenian translation of the word—to will the good," she said.

Institute Has Sound Ideas For Planning

"Better Homes for Ohio Families" was the theme of the Home Economics 14th annual Fall Institute which was held Friday and Saturday.

In the first phase of the Institute held Friday in the Agricultural Administration Auditorium, the three major shortcomings in house building today were emphasized.

They were: (1) There is an ignorance of what is needed and what is wanted in a home; (2) Nothing is being done about neighborhood planning; (3) Not enough is being done on household planning for the aged and physically handicapped.

Israel Stollman, associate professor in the School of Architecture, said, "Life magazine is spending more in the marketing analysis of their magazine than the whole country is spending for housing marketing analysis."

The result, as was later pointed out, is a hodge-podge of inconveniences for the housewife. Professor Stollman also attacked the lack of neighborhood planning.

"OUR NEIGHBORHOODS are just happening," he said.

He then gave an illustration of a city designed for the motor age, Radburn, N. J. The backs of the houses were turned to the street. The front faced walks and parks. Children did not have to cross any streets when going to school.

"This plan should be studied and restudied," said Stollman.

DR. ELAINE WEAVER, professor in the School of Home Economics, the second speaker of the afternoon, said that there was not enough planning being done for the aged and physically handicapped. She went on to tell of the research that was being done at Ohio State in this area.

A laboratory has been set up in Townshend Hall and experimentation is being done on the expenditure of energy. Doctors believe this research will be especially helpful in setting the household limits of cardiac patients.

The second phase of the Institute, held Saturday in Campbell Hall, was in the form of an idea exchange panel. Some of the topics discussed were: Art in Home Decorating, An Easier Life in Your Kitchen, Good Grooming Throughout the House, and Living with Your Mechanical Servants.

United States postage stamps were first issued in 1847.

Neophytes Benefit Columbus Agencies

Columbus welfare agencies benefitted from work done this week by fraternity initiates. Twenty-two agencies cooperated with the Inter-Fraternity Council on this project.

Neophytes from 37 of 44 social fraternities on the campus participated in Help Night.

EACH QUARTER during initiation week, one night is set aside for working at welfare agencies. This quarter, Help Night was held Tuesday, 7:30 to 11. All fraternities which had boys going through initiation participated.

Agency personnel agree that the boys did a good job although completed evaluation forms sent by fraternities to the agencies will not be returned until after initiation.

Work included everything from washing walls and laying tile flooring to filing envelopes. At St Vincent's Orphanage the Chi Phi's and the Sigma Pi's painted corridors, while at Linden Recreation Center the Delta Theta Sigmas scrubbed shelves and washed dishes.

AT THE Tuberculosis Society of Franklin County, the boys had an easier job. The Alpha Rho Chi's and the Delta Tau Delta's stuffed envelopes. The Theta Chi's also did general clerical work at the National Conference of Social Welfare.

At the Boys' Clubs of Columbus, 37 boys from Sigma Phi Epsilon, Pi Kappa Alpha, Phi Epsilon Pi, Triangle and Tau Kappa Epsilon all participated in general cleaning of the buildings.

At the Goodwill Industries, 20 from Alpha Gamma Sigma and Alpha Kappa Lambda did general cleaning, worked on trucks and worked in the bailing room from 7 to 11:20 p.m. At the South Side Settlement, 11 Alpha Tau Omega's laid tile, while at the Speech and Hearing Clinic the Beta Theta Pi's did mostly painting.

AT THE Glenwood Recreation Center, the Alpha Epsilon Pi's washed windows and at Schiller Recreation Center, the Delta Upsilon's and the Kappa Delta Rho's washed walls.

The Sigma Alpha Mu's stuffed industrial kits at the Central Ohio Heart Association from 7:30 to 12 p.m. The halls and schoolrooms at Nightingale Cottage got a scrubbing by six Sigma Nu's. At Alum Crest Hospital, the Zeta Beta Tau's went to work in the occupational

therapy department. Their work included cleaning bird cages, washing table tops and sorting materials.

The Kappa Sigma's went to work in the YWCA kitchen mopping floors, washing lockers, kitchen cabinets, and counter tops. The Phi Gamma Delta's helped at the Whetstone Recreation Center.

The Phi Delta Theta's at Sunshine Recreation Center stayed only until 9 p.m. because they ran out of work. The Lambda Chi Alpha's washed wood work and cleaned furnace registers at the Northside Nursery.

Twelve Phi Kappa Tau's washed walls and polished wood work at the Neighborhood House. At the Senior Citizens Center, the Sigma Alpha Epsilon's and Phi Kappa Sigma's washed walls, chairs, and card tables and mopped floors.

At Ben Franklin Hospital and at the Juvenile Diagnostic Center there was no definite record of what initiates had worked. Reports at Courage, Inc., were also incomplete. Alpha Gamma Rho and Phi Kappa Psi worked for Courage, Inc., going to private homes doing such work as putting up storm windows.

Professor Speaks On Free Lancing

Fred Zimmer, assistant professor in the fine arts department, and his wife, Anne, will speak on free lancing and editing at a dinner meeting of Theta Sigma Phi today. The journalism fraternity will meet at the Desert Inn at 6:30 p.m. for the event.

Zimmer, an Ohio State alumni, is also a graduate of Pratt Institute, New York. He has exhibited paintings in a one-man show in New York and in various national and international exhibitions.

His wife is a graduate of Vassar College and took publishing courses at Radcliff in Boston. She has been a staff member of both Vogue and Mademoiselle. Other publications for which she has written include the Herald Tribune, and Ford Times and Lincoln-Mercury magazines.

There were 775 female prisoners in Federal penitentiaries at the end of 1958, and 771 in the state prisons of New York alone.

Rabbi Suggests Study Date In Speech at Hillel Forum

Dr. Jerome Folkman, Rabbi of Temple Israel, spoke on "Dating and Inter-dating," at the Hillel Evening Forum, Sunday night. He suggested a study date as the best way for people to get acquainted.

The Rabbi mentioned that today there is too much stress placed on where you go, just for the sake of impressing others. He feels that in the long run, a date can be made more meaningful just by talking.

According to Rabbi Folkman, psychology and literature are particularly good topics to discuss because in these areas one is able to recite his own feelings.

THE RABBI also discussed the background of dating. He said that it is strictly an American phenomenon.

While every society has some kind of courtship, our system differs from that in other parts of the world. In our system dating is a form of recreation, while in other systems it usually indicates marriage.

The Rabbi, who studied in the fields of sociology, marriage and counseling, listed six levels of dating. They were acquaintance, friendship, dating steadily, going steady, pinning and engagement.

RABBI FOLKMAN also touched on some of our dating customs. One of them goes back to the days before there were street lights. He then gave the example of the escort customarily walking on the street side for the lady's protection.

Set to Discuss Racial Bias

(Continued from page 1)

of three years study and is aimed at solving the problems that do exist.

"We are very optimistic that chances for success for solving human relations problems here will be done due to qualified people on the commission and that we have support of the University administration and of Student Senate," Schwartz stated.

THE COMMISSION has said that it is not only interested in the mass problems, but individual problems. "Each person should be recognized as a single individual regardless of group classification," a spokesman said.

It is hoped that anyone who has a problem about discrimination, will bring it to the attention of the sub-commission. This can be done through the Senate office in the Union.

Schwartz said the sub-commission hopes to solve the problems through its own research and through the human relations workshop held at the University of Illinois this past summer.

THE ILLINOIS workshop covered two aspects. The first was a group meeting of the 70 delegates from all over the country. Five attended from Ohio State.

At the group meeting, resource people spoke on discrimination problems. Included among these were psychiatrists, a law professor, sociologists, representatives of professional human relations organizations, and Harlan Randolph, an Ohio State graduate student in the department of speech.

The second aspect of the workshop was a division of the group into six small groups. Each concentrated on a specific area of campus human relations.

The areas were housing, student organizations, social contact, public accommodations, religion on campus, and job placement.

The small groups met two to three times a day. They each prepared a summary of their findings which will be released soon by the National Student Association.

Some olive trees 500 to 600 years old are still productive.

He said that successful marriages stem from comparatively equal factors in religion, education, money, social class and age.

According to tradition, a man is supposed to be older than his wife. However, with the advance of science, this is merely a folklore. Women now outlive men.

The Rabbi concluded by saying that happiness and successful marriages simply depend upon the individuals involved.

Forum Opens Quarter With Hungary Talk

Another year for Dissent Forum. This student-faculty group is for discussing important issues from the point of view of democratic socialism. The meeting begins Friday at 8 p.m. Walter Wetzmann, history instructor, will speak in the Ohio Union Conference Theater. His unannounced topic will deal with some phase of the Hungarian Revolution.

Dissent Forum has a lively, if short, campus history. Originated in March, 1959, it gained Student Senate approval in April and in May received official sanction by CSA.

In its four spring meetings, attendance climbed from 70 to 250. Only standing room was available when Dr. Harvey Goldberg spoke on colonialism and the future of under-developed countries. The final meetings of spring drew downtown newspaper coverage.

Dissent Forum is a group of those of liberal persuasion. "The group serves to remind the campus that a university can have academic freedom only if even unpopular ideas are given a hearing," said Norman Clary, grad., president of Dissent Forum.

In the months to come, Clary hopes the forum will hear discussions of civil rights, labor, disengagement and the courts.

Journalism Class Now Open to All

Journalism 608, "The Press and Basic Issues of Our Times," (formerly designated Journalism 622), which will be given during the Winter Quarter, is now open to non-journalism majors.

THE THREE-HOUR course extends either graduate or undergraduate credit and, while primarily for seniors and graduate students, is also open to second quarter juniors.

The course will meet twice weekly, 3-4 p.m. Tuesdays and Thursdays, 3-5 p.m.

Journalism 608 undertakes to probe some of the basic issues beneath great news events of our times and the interrelationships of the issues. A series of lectures and seminars, built around six basic topics or issues, will be offered by distinguished faculty members of different departments of the University, principally history, political science, economics, sociology and law.

IN ADDITION, at least one lecturer, in the person of a distinguished professional journalist, will be brought to the campus to deliver the William Maxwell Memorial lectures, co-sponsored by the Graduate School and the School of Journalism. Last year's Maxwell lecturers were Hodding Carter, Pulitzer Prize-winning editor of the Delta Democrat-Times of Greenville, Miss., and James R. Wiggins, executive editor of the Washington (D. C.) Post.

Further information about the course may be obtained from Prof. George J. Kienzle, director of the School of Journalism, or Prof. F. W. Maguire, Ext 527.

No Mandarin In an 'Ah, So' Coolie Type

HOLLYWOOD —(UPI)—Oriental actor Sammee Tong has played Chinese roles for years and never has any trouble—except when the script calls for "Pidgin" English. "I got news for you," said Sammee, chopping away at his lunch-eon liver. "Sometimes a director's conception of a Chinese character is different from mine.

"Where I might expect a Chinese actor to walk into a room and sit down, the director may think he should slink in mysteriously, like a heathen.

"I sit down like everybody else," said Sammee proudly.

Tong, the houseboy on NBC-TV's "Bachelor Father," also criticized Hollywood's misconception of a Chinese as an "Ah, So," foot-scrapping sort.

"Only coolies and men of poverty go around nodding their heads and rubbing their hands sheepishly," Sammee said, "certainly not a Mandarin."

Explaining his problem playing some Chinese parts, the San Francisco-born Sammee said he occasionally has a tough time speaking broken-English.

"The average Chinese character is expected to make mistakes in speech," he added. "Not to belittle the Chinese, but for contrast."

"If I talked on the set like I'm talking to you right now, they'd probably toss me off," Sammee laughed—in perfect English.

"The difficult thing for me is remembering to leave the letter 'S' out of certain words in the script.

"For instance, I have a tendency to say 'What's wrong' instead of 'What wrong' like the houseboy character."

Sammee, who's not at all inscrutable, appeared in such films as "The Good Earth" and "Oil For the Lamps of China." He claims the easiest roles for him are those allowing him to speak the King's English correctly.

"I don't have any trouble playing a Chinese-Chinese when the language is Chinese," said Sammee with a sort of treadmill type logic.

Skytones Sing 'Almost Anything'

Last fall Lenny Hart, drum major of the Ohio State Marching Band, went to his training officer with an idea for an AFROTC singing group. He wanted to get some men together to sing carols for the dorms at Christmas time. From this idea came the "Skytones," a group of 55 singing Air Force cadets.

Training officer, C. B. Stiff, suggested that they go farther than just caroling, and form a permanent group to perform for the community as well as the campus.

WITH THIS idea in mind, Lenny and Sniff spent the remainder of the year organizing the choir and gaining University approval. The "Skytones" made their first campus appearance last year at the Military Ball.

This year they are back again, conducted by Lenny Hart. The cadets take great pride in being the only AFROTC choir in the country. They are comparable to the Army's "Singing Sergeants."

Plans for the future are tentative, but the "Skytones" are certain of radio and TV appearances as well as tours to air force bases to sing at Officer's Clubs. They will present a public concert in the spring and perform again at the Military Ball.

WHAT KIND of music do the "Skytones" sing? "Just about anything," according to their com-

FMA Food Fair Set

The 13th Annual Food Fair presented by the Fraternity Managers Association of Ohio State will be held on Thursday, in the New Arts and Crafts building at the Ohio State Fairgrounds from 7-10 p.m. The annual event will be in a new location this year located just east of the Youth Building on 17th Avenue.

The Fraternity Managers Association has invited the F.M.A. merchants to exhibit their merchandise and meet the fraternity buyers. More than sixty-five merchants will set up displays of their merchandise for inspection and sampling and will donate door prizes which will be drawn throughout the evening.

All fraternity men and women are welcome to attend and particular attention should be given to

this exhibition by buyers, stewards, housemothers, cooks, and officers. Rush and social chairmen will have an opportunity to inspect party favors, photographs and trophies on display.

The general chairman for this event is Mrs. Bernard Hecher and the committee chairmen are as follows: Mrs. Merle Reissig and Mr. David Fox, registration; Miss Ann Weatherby and Miss Lynn Burrell, invitations; Mr. Robert Potts, Mr. George Schorr, and Mr. James Umbarger, door prizes; and Mr. Dale Smith, publicity.

OSU Forum Again Rated Top Program

OSU Forum is proving to be the top program on WOSU-TV in this, its fourth and best year.

The Forum is telecast on WOSU-TV and also on WLWC-TV. WHIZ-TV, of Zanesville, will begin to pick it up shortly via kinescopic film a week after the original telecast. The Forum is broadcast statewide and is also picked up by the "Voice of America".

It is a 30 minute panel show which features timely topics of state, local and national interest. The topics are usually controversial in nature and are discussed by top experts in their respective fields.

The topic, "How Serious is the Exploding Population Problem," was discussed by Moderator Jorgen Birkland, Prof. and Chairman of Bacteriology, and his panel, Prof. David M. Harrison, department of Economics, and David F. Miller, Chairman of Zoology and Entomology, on October 21.

On October 29, at 7:30 p.m. "Educational Alternatives to the Enrollment Problem" will be discussed by Robert Yalman, of the Ohio Guidance and Testing Bureau, Ronald B. Thompson, Dean of Special Services, and Christian Berckel, Editor-Publisher of the "Blue Book of Schools."

Federal law forbids the portrait of any living person to appear on a U.S. postage stamp.

NAVY OPEN HOUSE

The Navy Department announces an Open House tonight from 7 to 9 p.m., to which everyone is invited at the Naval Annex in the men's Physical Education Building.

Displays, drill exhibitions, attack teacher demonstrations, and slides of the recent cruise will be featured.

Today is Navy Day. The theme is "U.S. Navy, Global Peace Through Mobile Seapower."

League Posts Go to Faculty

Four members of the Ohio State School of Nursing faculty have been elected to offices in the Ohio League for Nursing.

Mrs. Frances Pease, associate professor and associate director of the school, was named chairman of the League's department of baccalaureate and higher degrees. Also elected to office in the same department were: Wilda Chambers, associate professor, named to the steering committee; Marjorie Plummer, instructor, elected chairman of the nominating committee for the department; and Helen Wallace, assistant professor, also named to the nominating committee.

mander Gorden Stewart. They will include in their performances a wide variety of anything from religious to popular and classical to novelty songs.

When the cadets appear on the stage this year they will be attired in Air Force blues with white gloves and white waist belts. Completing the outfits will be gold shoulder cords and scarves.

The "Skytones" urge all groups and civic organizations interested in hearing them perform to call Gorden Stewart at AX-9-8703. They will sing wherever they are invited.

ALL MEN either in basic or advanced AFROTC are invited to try out for the choir. The group can use anyone who enjoys singing and can carry a tune. Practices are held at 7:30 every Tuesday evening. Officers of the "Skytones" are

Gorden Stewart, commander; Lenny Hart, conductor; Malcolm Miller, administrative officer; Phil Wilson, comptroller, and John Parr, property officer. Capt. Bernard Lorenz acts as the group's advisor.

The "Skytone's" primary purpose is to promote friendly relations between the Air Force and the public, a task which they are undertaking with promising success.

Railroads in the United States were using 23 different gauges of track in 1871.
