Plead Guilty; Judge Drops Theft Fines

Six Ohio State students pleaded guilty to reduced charges of petit larceny in Municipal Court yesterday. Judge Horace W. Troop fined each of the men \$50, then suspended the fine.

Dean of Men William S. Guthrie said that upon receiving a complete report from the Police Department the University would make a decision regarding disciplinary action. He said the students' University records would be taken into consideration before any action would be taken. He stated that a decision will be made before the weekend.

Eight men were involved in the case. None of them have a police record. The students were charged with various petty thefts from autos on the north side of Columbus.

Two of the men, Leland Gerwig and James LeValley, were charged with grand larceny but the judge reduced the charge to petit larceny. Atty. Fred Shoemaker, a city councilman, represented the youths.

The other students charged were Donald Stone, Engr-1; Lawrence V. Hiser, Engr-1; John E. Staley, Ed-1; and Charles A. Beatty, Com-1.

University Dames Model Fashions

SHEATHS TO SACKS—These were some of the creations exhibited at the University Dames Style show at the Youth Center of the Ohio State Fair Grounds Tuesday night. The fashions, supplied by a downtown store, were aimed at falling within the budget of the economy-minded university family. The clothes were modeled by the group's own members.

Atlas Missile Flies 4,500 Miles in Space; May Set Record for Engine Burning Time

CAPE CANAVERAL, Fla., Jan. 28—(UPI)—An Atlas missile which may have set a record for engine burning time traveled its intended range of less than intercontinental distance in a routine test Tuesday night, officials said last night.

There was no announcement on how far down the Atlantic tracking range the ICBM's nose cone splashed into the ocean. But informed sources said the Atlas was programmed to hurtle about 4,500 miles from the Cape on a nose cone re-entry test.

THE UNUSUAL aspect of the flight, to reporters and photographers covering the launching, was that the Atlas' "sustainer" engine seemed to burn much longer than in any of the previous 18 Atlas tests. The 100-ton weapon also appeared to head on a more easterly course than usual.

This sparked speculation that the Atlas was intended to travel much farther than 4,500 miles—perhaps to the moon.

But Maj. Gen. Donald N. Yates, commander of the Air Force Missile Test Center, said in reply to a United Press International query that the shot "was not an attempt to go to the moon or anything like that."

"THIS WAS a perfectly routine test in the Atlas ICBM test series," Yates said. The Atlas is scheduled to be ready for assignment to troops by July.

Yates declined to discuss the test objectives or disclose the distance the Atlas hurled its nose cone. The

weapon is designed to deliver a hydrogen warhead some 6,300 miles—full intercontinental range.

In Washington, a Defense Department spokesman said the Atlas was not intended to fly the full ICBM range. Only once, on Nov. 28, has the Atlas made an ocean-spanning hop.

THE SPOKESMAN said that "on the basis of early telemetry the test achieved most of the Air Force objectives." He added that it traveled the "programmed range."

The department did not elaborate on what it meant by "early" reports. But in the past the Air Force has explained that it is usually not certain of all the details of a flight until data reports from a missile have been examined in detail.

A thin, high cloud obscured the Atlas toward the end of its powered flight, causing a bluish-white wreath effect noticed as far south as West Palm Beach, 130 miles from the Cape.

THE ONLY APPARENT explanations for the long-burning Atlas were that the Air Force wanted to get the missile to an unusually high altitude or that it was under power longer than was intended.

If the Atlas did reach a higher altitude than usual, this would cause the nose cone to plummet to earth at more than the 15,000 miles an hour speed of the cone in a standard intercontinental flight.

The Air Force could thus determine, under extreme conditions, the

effects of terrific atmospheric friction on the cone as it plummeted earthward.

The latest Atlas was the second in a new series, designed to test lighter weight materials in the missile and to simplify its mechanism. It is powered by three engines, two of which drop off early in flight.

Student Jobs Are Available

Are you a capable homemaker?

A chance for coeds to gain experience in this field is offered by several Columbus residents. One part-time opening provides board and salary for help with household tasks and care of children. Another full time position offers room and board.

Three similar openings await student married couples. Demands are not excessive, and the return is room and board for those who qualify.

Many employment opportunities for students' wives, especially those with stenographic skills, are offered. A recent opening represents an interesting future assisting a career executive in public relations.

Those interested should apply in Room 201, Student Services Building.

Soldiers Curb Mobs When Africans Riot

LEOPOLDVILLE, Belgian Congo, Jan. 28—(UPI)—Colonial authorities called out armed troops last night to disperse mobs of African demonstrators who roamed through this Belgian Congo capital looting buildings and stoning European-owned cars.

The "public force" troops—African soldiers officered by Europeans—were rushed into action when the mobs overpowered the regular baton-armed police.

THE SOLDIERS, who had been held in reserve since the bloody pro-independence rioting of three weeks ago, used their rifles as clubs to scatter the rioters.

At least 80 Africans were arrested. One African was found dead of unknown cause.

The new outbreaks began yesterday morning and continued through the night. Africans defied a curfew and set up a road block between the Ngiri-Ngiri and Badalungwa sections of the city. European-owned cars passing through were stoned.

THE RIOTERS also smashed windows in a veterans' social center in the Dendale area of this capital.

One section of a road in the Ngiri-Ngiri section was strewn for hundreds of yards with bricks, broken furniture, smashed road signs and broken bottles.

The debris had to be cleared away by troops before traffic could resume.

THE RIOTING occurred in the wake of agitation by Africans for independence of this uranium-rich Belgian African colony.

Officials said today, however, that the latest rioting appeared to have lost its political significance and to have become "plain vandalism." Most of the demonstrators were members of Leopoldville's 30,000 registered unemployed or Africans who have come in from the bush in hopes of getting work in the city.

Mademoiselle Selects Four OSU Women

Four Ohio State coeds will represent the University on Mademoiselle's national College Board.

THEY ARE among the 784 students who competed with applicants from colleges all over the nation to win places on the board.

Mary Misamore, Jour-3, Roberta Ross, Jour-4, Christi Welter, Jour-4, and Brenda Workman, A-1, will report to the magazine about college life at Ohio State.

EACH WOMAN will complete two assignments in competition for the 20 Guest Editorships that will be awarded at the end of May.

The Guest Editors will go to New York for four weeks to help write, edit and illustrate the magazine for the August 1959 College issue. Transportation will be paid to and from New York and the women will receive a regular salary for their work.

In addition to their magazine work, the Guest Editors will interview men and women in certain fields, visit showrooms, publishing houses and advertising agencies and will be Mademoiselle's guests in a round of party and theatre-going.

Union Open House To Be Tomorrow

The Ohio Union open house, cancelled last week because of flood conditions, will be held tomorrow from 7 to 9 p.m.

Activities will include interpretive readings by Harlin Randolph of the department of speech to be held in the Main Lounge. The music from "My Fair Lady" will be played in the Music Lounge and a program of cartoons will be shown in the Conference Theater.

The affair is primarily for all new freshmen enrolled this quarter and also to honor the residents of Stradley Hall which opened the first of the month. However, all students are invited to attend.

CSA Grants Recognition

Counterpoint and the Student Council on Religious Affairs were granted re-recognition by the Council on Student Affairs at the meeting last night.

CSA granted recognition to the University Sports Car Club. Provisional recognition was granted to Stradley Hall Senate, Women's Club of the Graduate School of Agricultural Economics and Rural Sociology, and Pi Sigma Alpha, political science honorary.

The Council accepted the resignation of Prof. Thomas D. Harmon, department of dairy technology, effective April 1.

Byron Kennard reported that the Student Commission heard four cases during Fall Quarter. The Student Court heard 230 cases, of which 64 were dismissed, 137 were fined and 29 had fines suspended. The WSGA Standards Commission reported no violations of University regulation during Fall Quarter.

Fire in Lord Hall Blamed on Cloth

Protective cloth on light fixtures is to blame for the Jan. 13 Lord Hall fire, according to Gordon B. Carson, vice president in charge of business and finance.

Carson said workers on the second floor left the fixtures covered when they went home.

The next morning he said, the janitor turned on the lights without checking to see if they were still covered. Estimated damage of the fire was \$38,000.

Apathy

Editor's Note:

The following editorial appeared in the Daily Illini under the title of "Who Gives a Damn?" We thought we recognized some of the people the editorial describes on our own campus. How about you?

A more popular disease than mono or Asian flu with students this year has been student apathy.

It has been estimated that as much as 99 per cent of the student body has been afflicted with this old but still prevalent illness. And all predictions seem to indicate that there will not be much relief from it during 1959.

The symptoms are many and very easy to spot. First signs of affliction can be seen when a student is asked to do something and he replies, "I don't think so, get somebody else to do it."

After this despondency sets in and the student looks tired, run down. The general "I-don't-give-a-damn" stage has set in.

Some people afflicted with this disease make attempts to get rid of it by becoming "joiners" or "hangers-oners." These people are inclined to say, "Of course, I'm not sick, I belong to three major activities, 10 minor ones, drink coffee in . . . every morning at 10 o'clock and belong to several social organizations. In fact, my picture appeared in the . . . 15 times last year—"

Yet despite their multitudinous efforts, these students rarely overcome the disease—mostly because they are just too busy joining groups and keeping track of how many times their picture appeared in the yearbook.

Other people try beating the disease by sleeping. They sleep 10 hours every night, sleep in classes, sleep during the Ed Sullivan show and even sleep on dates. These people generally do not stay on campus too long.

There are students who take the extreme opposite approach to getting rid of the disease than the sleeping patient. They don't sleep at all. Instead they stay up night after night playing cards, drinking beer and talking to whomever will listen. Oftentimes, these students are only on campus one or two semesters at the most.

As the disease advances, the symptoms get worse. Generally a persecution complex sets in and the patient attempts to undermine any of his friends (or enemies) who are making honest attempts to think for themselves and to get something done.

Such a student when asked if he would like to go to a lecture on the state of the United Nations by Sir Leslie Munroe, current president of the U.N. General Assembly, replied, "Nah, I've got better things to do—got to clean my beer mug for tomorrow night's blast."

The apathetic epidemic seemed to be letting up the few weeks before Christmas when student interest was unusually high on the Student Senate discrimination bill. However this was only temporary relief since everyone has arrived back from Christmas vacation "exhausted."

In fact, interest in studies and activities of a constructive nature seems to be at an all time low.

But then, this shouldn't astound anyone. After all, who cares?
 —Daily Illini.

Panhel Head Supports SGB Ruling

EVANSTON, Ill.—The president of Northwestern's Panhellenic Association has publicly spoken out in support of the move to have Greek houses remove their discriminatory clauses by Sept. 1, 1963 or else be forced to relinquish their national affiliations.

The motion, which was introduced to the Student Governing Board last week, was voted on at a meeting Wednesday.

SPEAKING AT a Panhel meeting Friday, Suzanne Straight, Pi Beta Phi, also defended SGB's right to act on this issue.

"This matter concerns the entire student body and therefore should be handled by SGB," Miss Straight said.

Thus Miss Straight became the first-known fraternity or sorority leader in the long standing jurisdictional dispute between SGB and the inter-Greek groups to support the ultimate authority of student government over Panhellenic.

"THE UNIVERSITY doesn't believe in racial discrimination, and it is contradictory to allow discriminatory groups," Miss Straight added.

Opposing Miss Straight's views were Rusty Conklin, Delta Delta Delta, and Sally Thurnau, Kappa Kappa Gamma. Miss Conklin suggested that instead of the present motion, the 1963 date be pushed back to 1970 with a student, faculty, administration board to meet annually to determine progress on the elimination of discriminatory clauses.

On the other part of the motion which calls for the elimination of required alumni recommendations by the 1963 deadline, feeling of the representatives at the meeting was that Panhel should investigate the cases in which the fact that sororities require "recs" are used to discriminate before coming up with a compromise solution.

Panhellenic and the Interfraternity Council each have one representative on the 19-member Student Governing Board.

Student Reviews Russell's Book

Editor's Note: David K. King, a graduate student from London, England, has written today's religious book review. All books reviewed in the series are available in the Browsing Room.

WHY I AM NOT A CHRISTIAN, by Bertrand Russell, was published in New York by Simon & Schuster in 1957.

As America enters the latest of its periodic resurgences of religion complete with circus salvation in Madison Square Garden and photogenic television proselytizers for the Serutan set, the republication of Lord Russell's essays on religion seems particularly appropriate.

Lord Russell is no militant atheist, but he is deeply concerned over the evils inherent in the

acceptance of any system with a basis in dogma, be it fascism or religion. There are no extended theological arguments over the existence of God, but rather a brief refutation of the classic proofs of His existence.

HIS QUARREL is not with religion per se but with organized religion and its distorted concepts of morality.

While the subject matter of these essays ranges from "Our Sexual Ethics" to "Life in the Middle Ages," they are all written in the clear argumentative style that marks most of Russell's work.

They are logical and satirical rather than profound. While condemning Christianity, he is not fanatical—and his position is therefore less assailable.

IT IS UNFORTUNATE that theological debates so often fall into contests between those who deny God's existence and those who worship Him in some fashion or another.

The acknowledgment of a supreme creator does not compel of itself worship. One's parents are admired and perhaps revered, not for bringing one into existence, but for their care during one's childhood.

Though earth may be God's creation, few could claim that He has been an exemplary parent. If Lord Russell is primarily concerned with the injurious effects of worship and considers God's existence a moot question, it is unfortunate that the standard channels of theological debate have forced him into the extreme atheist position.

Dr. Trueblood To Speak at Faculty Club

Dr. D. Elton Trueblood who is often referred to as the most quoted religious author in America, will visit Ohio State Saturday.

He will lead an informal discussion on the Yokefellow Movement at the Faculty Club from 11 to 12 a.m. From 1:30 to 4 p.m. he will conduct a faculty forum on the theme, "A Faith With Integrity," also at the Faculty Club. All faculty members are cordially invited to attend these meetings.

Dr. Trueblood will also be guest preacher at the Indianola Presbyterian Church Sunday.

Dr. Trueblood is the author of "The Yoke of Christ," "Your Other Vocation," "The Philosophy of Religion," and 12 other books. He is professor of philosophy at Earlham College, a former professor of philosophy and religion at Stanford University and at Harvard University. He has served as chief of religious information of the Voice of America.

New Course Is Offered

International Studies 520, the oriental world, five credit hours—not listed in the printed Time Schedule—is scheduled for Spring Quarter at 2 p.m. daily in Room 213, Townshend Hall.

This new interdepartmental course is designed for the non-specialist who seeks a general introduction to the life of an increasingly significant part of the world outside the familiar Western tradition.

The emphasis will be on contemporary Asian civilizations, including geographic and racial backgrounds, historical and cultural heritage, social organizations, and economic and political problems.

Members of the departments of history, political science, sociology and anthropology, geography, fine arts, and education will participate in the teaching of this course, with Prof. Kazuo Kawai in charge.

This course has been approved by the College of Arts and Sciences and the College of Education as acceptable for satisfying the new basic University requirements for social science. There are no special prerequisites.

College counselors and departmental advisers are requested to bring this new unlisted course to the attention of their students.

Dairy Meet Slated Here

The 26th annual dairy technology conference, scheduled for Feb. 3-5, at Ohio State, will feature a session on the important and somewhat controversial subject of trade practices for the dairy industry.

Three national authorities will be featured at the sessions—Dr. T. N. Beckman, professor of business organization at Ohio State; Ross Clark, secretary-manager, Mid-South Milk Producers Association, Memphis, Tenn., and Dr. Charles French, chairman, agricultural economics department, Purdue University.

The program is designed to permit an objective examination of the entire matter of trade practice regulations to provide facts and experiences upon which the dairy industry can base its program for the year.

Lectures Set to Honor Retiring Scholar

Four lectures on philosophy and physics will be held here during February in honor of Dr. Alfred Landé, who will retire next summer after 29 years as professor in the physics and astronomy department.

Early work by Dr. Landé on the theoretical interpretation of certain problems in atomic spectroscopy laid a foundation for the present day understanding of the magnetic properties of atoms.

PROF. HENRY MARGENAU of the Yale University physics department will open the series with a talk on "The Interpretation of Measurement in Quantum Mechanics" in the Physics Building at 4 p.m. Monday, Feb. 9.

Professor Landé, who for many years has taught graduate courses dealing with quantum mechanics, relativity and electrodynamics at Ohio State, will deliver the second lecture on Tuesday, Feb. 10. His talk will be entitled "From Duality to Unity."

The lectures will be sponsored by the Graduate School and the department of physics and astronomy. All four will be held at 4 p.m. in Room 100 of the Physics

Alfred Landé

Building, and will be open without charge to the public.

ON THURSDAY, Feb. 12, Dr. Virgil Hinshaw Jr., associate professor of philosophy at Ohio State, will speak on "Determinism versus Continuity."

"The Nature and Role of Proofs" will be the title of the final lecture, to be given by Dr. Tibor Rado, University research professor in mathematics.

DR. LANDE has been in demand

for a number of years as a lecturer on the philosophy of modern physics. In January, 1958, he was invited to present a paper before the International Symposium for Axiomatics of Mathematics.

Later in the year, under the sponsorship of the National Science Foundation, he took an active part in scientific and philosophical meetings in London, Paris, Zurich and Venice. He lives at 1879 Coventry Rd.

Lockheed Missile Systems Division is systems manager for such major, long-term projects as the Navy Polaris IRBM, Q-5, X-7, Army Kingfisher and other important space, research and development programs. The Division was honored at the first National Missile Industry Conference as "the organization that contributed most in the past year to the development of the art of missiles and astronautics."

Headquarters for the Division are located at Sunnyvale, California, on the San Francisco Peninsula. Research and Development facilities are in the Stanford Industrial Park in nearby Palo Alto. Other Division locations are at Van Nuys, Santa Cruz, and Santa Maria, California; Cape Canaveral, Florida; Alamogordo, New Mexico; and Hawaii. Together, they provide complete facilities with the latest scientific and technical equipment, including one of the most advanced computing centers in the nation. Employee benefits are among the best in the industry.

Graduate Study Program

For those who qualify and desire to continue their education, the Graduate Study Program enables them to obtain advanced degrees at the University of California at Berkeley, or Stanford University, while employed in their chosen fields at Lockheed.

*Our college representative
will be available on campus for interviews on
FEBRUARY 5 and 6

Bucks To Host Minnesota Saturday

CAGEY—Paul Lehman will add plenty of fast action and rigid competition for the Bucks in their televised clash Saturday.

By Jack Wittenmeier

Minnesota, the "surprise" team of the Big Ten, invades St. John Arena Saturday afternoon, hoping to inflate their prestige at the expense of the Buckeyes.

The Golden Gophers, firm believers in the youth movement, will carry a 4-2 conference slate into the game, good enough to hold down the conference's third place spot.

Banking on good height and plenty of speed, Coach Ozzie Cowles is aiming for the Big Ten's higher strata after last year's ninth place finish.

IN HIS eleventh year as head coach, Cowles is counting heavily on sophomores to raise the Gophers' basketball fortunes.

These newcomers plus a nucleus of six returning lettermen figure to make Minnesota tough.

To date, the Gophers can show conference victories over Wisconsin, Purdue, Northwestern and Illinois.

Only league leading Michigan State and Indiana have been able to hole the Gophers in Big Ten play.

AS A TEAM, Minnesota leads the Big Ten in defense, allowing opponents an average of 68.3 points per game.

Offensively, the Gophers have been shooting less than any other conference team (less than 70 attempts per game). However, their ability to score is not wanting. Minnesota has hit on 40 per cent of its floor shots and has controlled 53.6 per cent of all rebounds.

Minnesota's claim to fame this season is high scoring Ron Johnson. The junior forward's 28 point output against Illinois Monday vaulted him into the conference scoring lead with a 22.3 average.

AS A SOPHOMORE last season, Johnson accumulated a 17.5 average. At 6-7, he is the squad's top rebounder, moving exceptionally well for his height.

The other forward position is

held by Tom Benson. A 6-4 junior, Benson has good speed and is considered an outstanding shot. His 10.3 point average is second best on the squad.

At center, 6-6 Jerry Butler ranks as one of the top sophomore prospects on the squad. Butler, who will carry a 9.0 average into Saturday's game, is developing into an excellent rebounder.

FROM THE outside, the Bucks will have to watch the Gophers' captain, Rog "Whitey" Johnson. The 6-0 senior guard is a fiery competitor and the squad's playmaker. Johnson is effective in drive ins and can hit from the outside.

Johnson's running mate at guard will be 6-5 sophomore Paul Lehman.

Buck Soccer Stars Picked As All-Ohio

Two members of Ohio State's 1958 varsity soccer squad have been named on the All-Ohio Soccer Team.

Fullback Gunars Neiders, a senior, has been named to the first team. Co-Capt. Juris Krisjansons, also a senior, is on the second team as a center halfback.

Krisjansons has also been selected as a member of the Midwestern Olympic Trial Team. This team, made up of the top collegiate soccer players, will compete in the western trials Mar. 14 in St. Louis.

From the western trials, the best players will be chosen to meet the eastern all-star team. The top performers in this game will make up the United States Olympic Soccer team.

Sports Whirl . . .

World Series Pact May Be Extended

THE ASSOCIATED PRESS reports that Baseball Commissioner Ford Frick has been asked to extend the current radio and television contract for the World Series and All-Star games three more years.

The proposal was made by the sponsor—Gillette. The present contract expires in 1961 after the World Series. It calls for a payment of 16 and one-quarter million dollars at the rate of 3¼ million dollars a year.

The same fee is called for through 1962, 1963 and 1964 if Frick agrees to the terms.

THE OUSTED football coach at Notre Dame, Terry Brennan, says he isn't bitter about being fired.

Talking about his firing by officials at Notre Dame at the Greenville, N. C. Touchdown Club Banquet yesterday evening, Brennan said: "It was their prerogative. I don't agree with the decision and I feel that I'm a good football coach."

A Side Glance at Sports . . .

THE CLEVELAND INDIANS have won the 1959 contract signing championship. All 39 players on the Tribe roster have agreed to terms.

The last four sent in signed contracts yesterday. They were pitchers Hal Woodeshick and Bill Dailey and infielders Woody Held and Billy Harrell.

IT MIGHT BE WISE to make a mental memorandum that Ohio State meets Minnesota at St. John Arena Saturday afternoon. Doors will open at 2:15 p.m. and a prelim between Frosh and Jayvees will start at 2:30 p.m. Activity cards are good for admission in unreserved areas of the arena, mezzanine and balcony. Reserved seats at \$2.00 are available at the east and west ticket lobbies. The game will be regionally televised at 4:30 p.m.

HEAVYWEIGHT Eddie Machen has filed a suit in which he seeks to stop Ingemar Johansson from meeting champion Floyd Patterson.

Machen was knocked out by Johansson last September, but he says the Swedish fighter "promised a return match with me before he met anyone else."

Meanwhile, promoter Bill Rosensohn is going ahead with his plans to stage a meeting between Johansson and Patterson. He hopes to announce his plans within a few days.

Turbaned Sikhs Spread From India to America

INDIAN SIKHS—Gurdeep Singh Chawla (left), and Gurmukh Singh Bedi, graduate students, look at the small comb, monogrammed with a sword, which every sikhs uses to keep his hair tidy. Colorful turbans and small silver bracelets worn on the right arm are parts of the costume which Indian sikhs must wear at all times.

—Photo by Don Bandy.

By Gurmukh S. Bedi

The handful of bearded and turbaned Sikhs is the cause of much comment on campus.

They are members of a religious sect in India which is based on a tradition of martial spirit along with religion.

The Sikhs at Ohio State met recently at River Road dorms in quiet prayers to celebrate the anniversary of the birth of their tenth and last prophet, Guru Gobind Singh. Back in India the Sikh temples were aglow with colorful lights and filled with the music of hymns. Family rejoicing and cultural programs added to the celebration.

STILL EAGERLY sought by the Indian army, the Sikhs have a great record of distinctions and decorations in the two world wars and invariably bear "Singh," which means "lion," as their middle name.

Not only distinguished in defense services, they drive a major share of India's transport, peddle in the streets of European cities and towns and ranch in the western United States.

One Sikh, Dalip Singh Saund, became a United States Congressman from California.

HIGH OR LOW in society, a Sikh enjoys the courtesy title of Sirdar which means a head or leader. His faith tells him to always be prepared and have the following five K's on his person:

1. Kesh, meaning hair. A true Sikh must never cut any hair from his body.
2. Kangha, or comb, to keep his hair tidy.

INCREASE TUITION

ITHACA, N. Y. — (AP) — Cornell University announced it will increase tuition by \$175 a year in its endowed colleges, starting July, 1959. Students in the Colleges of Architecture, Arts and Sciences, Engineering, School of Hotel Administration and the unclassified division will be charged \$1,425 tuition. At the other colleges, it will remain \$1,250.

GETTING READY — The 1959 Greek Week Committee (left to right) is Judy Spurgeon, Ray Waldman, Carroll Lurding, John McHugh, Bev

Herbst. Seated are Andy Fanta and Judy Katz, co-chairmen.
—Photo by Jim Katz.

Greeks Prepare for 'Greek Week'

By Judy Katz

"Fraternity—Ideas and Ideals," is the theme for the 1959 Greek Week.

Although the campaigns of past years (crusade for freedom, safety, etc.) were successful, the Greek Week Executive Committee decided to attempt a new type of program this year.

THE PURPOSE of Greek Week is twofold: To evaluate the present Greek system and to plan for the future.

The highlight of the week is under the direction of what is called the national area. National and regional officers of all fraternities and sororities have been invited to the campus.

The response thus far has been better than hoped for, and at least one representative from each chapter is expected.

THE CALENDAR for Greek Week, Friday, Feb. 27 to Mar. 1, is a busy and varied one. Friday from 4 to 6 p.m. the sororities will sponsor open houses. Faculty and administration are invited. This event is new to Greek Week.

Friday evening vesper services will be held at the Hillel Foundation at 6:45.

The Greek Week Mershon Program is Friday night at 8. The evening features Dave Brubeck and the Billy Williams Quartet. The Greek Week king and queen will be crowned during intermission.

SATURDAY, A luncheon will be held in the Union honoring the guests from national and regional

offices. Presidents of the sorority pledge classes will serve as hostesses.

Workshops will be held following the luncheon. The national people and campus leaders will head the discussions, which will be attended by sorority and fraternity officers. The topics will be on subjects relevant to the Greek Week theme.

CATHOLIC MASSES and Protestant services will take place Sunday morning. The religious committee is working with the leaders of the churches to plan these services.

The final judging of the interfraternity sing winners will take place Sunday afternoon at Mershon.

MONDAY NIGHT are the faculty-exchange dinners. Sorority and fraternity members have dinner at other houses, and faculty members are asked to be guests at the Greek houses for this event.

The pledge dance is Monday night. A pledge princess will be

crowned, and the winners of the combo contest will play.

Movies Serve French Fare But Nothing Like B. Bardot

By Charlotte Jenkins

No popcorn. And no necking in the balcony . . .

Maybe the students were too intent on watching the English translation at the bottom of the French film. But there seemed to be no disturbances in the University Hall Chapel movie Tuesday.

THE FRENCH actors droned on. The movie was not spectacular, only black and white. It was "Gervaise," based on one of the novels by Emile Zola.

The three o'clock bell rang. Two or three students ambled out the door.

The policeman hurried to the door to prevent anyone waiting in the outside hall from slipping in to see the movie. "The next showing is at four o'clock. You can

City Colleges May Ask Aid

(By The Associated Press)

Representatives of Ohio's municipally operated colleges will confer with Governor DiSalle in Columbus soon.

DiSalle said yesterday his secretary is arranging the conference. But he added he does not see eye-to-eye with those who advocate state subsidies for the city colleges.

He said he talked with representatives of the University of Toledo before coming to Columbus, and the suggestion was made that it might become a Northwest Ohio State University. The governor said he pointed out that Bowling Green State University already serves the area, but did concede that Toledo has an engineering school which Bowling Green does not. He said the conference here should bring out whether a related situation exists, for example, in the Cincinnati area.

Mirror Of The Campus

Dr. Jack N. Baldwin, department of bacteriology, will speak at the Botanical Colloquium today at 4 p. m. in Room 110, Botany and Zoology Building. He will speak on "Fragmentary Hybridization in Bacteria." The public is invited.

The School of Music will present a graduating recital Thursday, Feb. 5, at 1 p. m. in Hughes Hall Auditorium. Appearing in the recital will be Gary W. Stamm, baritone horn, and Shirley Pickett, piano.

A 90-minute film dramatizing the final days in the life of Socrates, will be rebroadcast over Station WOSU-TV, channel 34, at 6 p. m. Saturday.

Ohio State graduate students from Africa, Australia and Pakistan and an Indian scholar will appear on the program, "People and Places," over Station WOSU-TV, channel 34, at 5:45 p. m. on Mondays in February.

The graduate students are Albert J. Maleche of Kenya, Feb. 2; Sydney A. Giddings of Australia, Feb. 9; and Diaz Ul Haque of Pakistan, Feb. 23. Dr. N. G. D. Joardar, an Indian scholar and a member of the Koinonia Foundation, Baltimore, Md., will appear on the Feb. 16 program.

Each of the broadcasts will be repeated over radio station WOSU at 1:30 p. m. the following Sunday.

Row, Row, Row . . .

Huck Finn Must Have Liked Work

LOUISVILLE, Ky. — (P)—Three students from Xavier University in Cincinnati have passed Louisville in a trip down the Ohio River in a 15-year-old Army surplus rubber raft. And they report they are getting more exercise than sleep along the way.

Said Mike O'Connell: "We've been gone (from Cincinnati) about 50 hours and I guess we've had only five hours of sleep. Mainly we've been fighting to keep warm."

O'CONNELL and his companions, Jim Kappas and John Kappas were hit by between-semester doldrums. They decided on the raft

trip to New Orleans in time for Mardi Gras, Feb. 10.

The three, all football players, financed the trip by a student pool. Their Xavier buddies were given an opportunity to donate toward expense money, and possibly win some money themselves.

Each contributor selected a downriver town where he figured the journey would end. The person picking the right town will be paid

off at odds of five to one, based on his investment.

THEY COLLECTED \$140, most of which went for the raft and heavy clothing.

O'Connell said the sendoff in Cincinnati Saturday was "gala and embarrassing." He explained:

"Students were cheering as we left but when the raft got near mid-river eddies on the Ohio, it began spinning like a top."

Harvard Ex-President Tells How Education Can Be Improved

SAN FRANCISCO—(UPI)—Dr. James B. Conant said today students in the nation's high schools should be grouped according to ability.

The bright ones, he said, should have a chance to develop their special talents. Some of the slower ones should be permitted to drop out and go to work.

CONANT, president emeritus of Harvard University, spoke before the National School Boards Association convention here. He summarized the findings of a two-year study.

At the same time he distributed for the first time copies of his book, *The American High School Today*, which gives full results of the study financed by the Carnegie Corporation.

He said he believes the number of small high schools must be drastically reduced.

"ASIDE FROM THIS important change," he said, "I believe no radical alteration in the basic pattern of American education is necessary in order to improve our public high schools."

But he did make numerous recommendations, with particular stress on the development of bright students while they are still in high school.

"The academically talented student, as a rule," he said, "is not being sufficiently challenged, does not work hard enough, and his program of academic subjects is not of sufficient range."

He said he was urging school boards to have the superintendent make an inventory of the programs of talented students in the graduating class.

"THE ACADEMICALLY talented, as I use the term," he said, "are those students who can rewardingly study mathematics, science and a foreign language in grades eleven and twelve."

"Those students whose scholastic aptitude as determined by tests in the eighth or ninth grade places them in the top 15 per cent on a national basis are, with few exceptions, in this group."

He said that a majority of talented students should study four years of mathematics, three years of science and at least four years of a foreign language in addition to the seven or eight years of English and social studies required of all.

HE SAID he recognized that "ability grouping is a highly controversial subject among administrators and teachers."

The recommended grouping, he explained, would be on a subject by subject basis.

"This type of grouping," he said, "is not to be confused with across-the-board grouping according to which a given student is placed in a particular section in all courses. Under this scheme, a student may be in the top section in English but the middle section in history or ninth-grade algebra."

FOR STUDENTS at the low end of the learning scale he suggested that in some cases leaving school for a job would be best.

"If the simple type of vocational training is leading directly to a job," he said, "I see no reason why transfer to full-time work during the tenth or eleventh grade should not be applauded by all concerned not be applauded by all con-

cerned . . .

"Being out of school and unemployed is one thing; being out of

school and satisfactorily employed is quite another."

Regarding elimination of small

schools, he said he believed a graduating class of 100 to be the minimum acceptable.
