TRUSTEES RENAME BUILDINGS, ROAD, DEPARTMENT

COLUMBUS -- The Ohio State University's Board of Trustees Thursday (5/4) renamed the Civil and Aeronautical Engineering Building to honor Harold Bolz, dean emeritus of the College of Engineering. The building, 2036 Neil Ave., will now be known as Harold A. Bolz Hall.

Bolz, 3097 Herrick Road, UPPER ARLINGTON (43221), directed the College of Engineering's expansion and modernization from 1958 to 1976 while serving as dean and director of the Engineering Experiment Station.

A mechanical engineer, he later served as interim president of Ohio Northern University. He is a past president of the American Society for Engineering Education. He served as a member of several professional and public organizations.

Trustees said Bolz's efforts led to the establishment of some of the finest engineering facilities of any university in the country.
By any other name

IT'S GRAND to have a building named after you, as Harold Bolz, dean emeritus of engineering, will testify. The Civil and Aeronautical Engineering Building now is Bolz Hall, to acknowledge his contributions to the college from 1958-76 as dean and as director of the Engineering Research Station. Renaming and rededication ceremonies will be held Dec. 9.
ENGINEERING BUILDING DEDICATED TO FORMER DEAN HAROLD BOLZ

COLUMBUS -- Harold A. Bolz Hall at The Ohio State University was rededicated Saturday (12/9) in a ceremony honoring the former dean of engineering.

The building at 2036 Neil Ave., formerly the Civil and Aeronautical Engineering Building, was renamed by the university Board of Trustees last May.
